RELEASE VERDICT

REQUIRES REMEDIATION

Current: 47% | Target: 90% | Gap: +43%

The Revenue Management System Kenya regression suite completed with 172 tests achieving a 47% pass rate (82 passed, 86 failed), significantly below the 90% target threshold. The results indicate systemic issues across both UI and API layers, with API automation showing particularly low stability at 27.5% pass rate compared to UI at 65.2%. The correlation between backend instability and frontend failures suggests that many UI issues may be symptomatic of underlying API defects, as unreliable backend responses can cascade into frontend functionality problems. The severity of API failures points to potential core service disruptions, data consistency issues, or integration problems that require immediate investigation to restore system stability.

RECOMMENDED ACTIONS

#	Recommended Action	Due	Priority
1	Prioritize root cause analysis of the 58 failing API tests to identify common failure patterns or service dependencies	Immediate	P1
2	Implement API response logging and monitoring to capture failure points and error patterns in real-time	3 days	P1
3	Conduct immediate triage of critical revenue calculation and transaction processing endpoints	5 days	P2
4	Review recent deployments or infrastructure changes that may have impacted system stability	1 week	P2
5	Establish temporary API mocking for UI tests to isolate frontend issues from backend instability	1 week	P2
6	Schedule focused debugging sessions between development and operations teams to address integration points	2 weeks	P3

KEY FINDINGS

1	API layer showing critical instability with only 22 of 80 tests passing (27.5% pass rate)
2	UI automation performing relatively better at 65.2% pass rate but still below acceptable thresholds
3	43% overall failure rate indicates widespread system issues rather than isolated defects
4	Low API reliability likely contributing to cascading failures in UI layer functionality
5	System achieving only 52% of target pass rate indicating significant stability gaps
