RELEASE VERDICT

REQUIRES REMEDIATION

Current: 30% | Target: 90% | Gap: +60%

The Revenue Management System Kenya backend API testing reveals significant system reliability concerns with a 30% overall pass rate against the 90% target, indicating widespread API endpoint failures and response issues across both the automated API suite (27.5% pass rate) and backend smoke validation suite (33% pass rate). The consistent failure pattern across both test categories suggests systemic backend service issues rather than isolated endpoint problems, with approximately 113 endpoints exhibiting incorrect responses, unavailability, or data integrity issues that require immediate technical investigation and remediation to restore the system to production-ready status.

RECOMMENDED ACTIONS

#	Recommended Action	Due	Priority
1	Conduct immediate root cause analysis on the 113 failing endpoints to identify common failure patterns and service dependencies	Immediate	P1
2	Prioritize fixing critical revenue calculation and management endpoints that directly impact business operations	3 days	P1
3	Review backend service logs and monitoring data to identify infrastructure, database connectivity, or configuration issues	5 days	P2
4	Implement enhanced error handling and response validation in the API layer to improve reliability	1 week	P2
5	Establish incremental fix-and-verify cycles focusing on high-priority endpoint groups before full regression	1 week	P2
6	Deploy performance profiling on backend services to identify potential timeout, memory, or resource constraints affecting API responses	2 weeks	P3

KEY FINDINGS

1	Critical backend stability issue with 70% of API endpoints returning failures or incorrect responses
2	API Automation suite shows 58 endpoint failures out of 80, indicating widespread service degradation
3	Backend Smoke Validation suite reports 59 failures from 88 tests, confirming systemic response issues
4	Both test suites show similar failure rates suggesting consistent backend service problems rather than isolated issues
5	60% gap from target pass rate indicates revenue management core functionalities are compromised
