RELEASE VERDICT

REQUIRES REMEDIATION

Current: 1% | Target: 90% | Gap: +89%

The Revenue Management System for Kenya shows critical system-wide instability with a 1% pass rate across 77 automated regression tests, indicating fundamental issues with the application's current state. The complete failure of UI automation (0/1 passed) suggests frontend components are either not rendering correctly or are unable to interact with backend services, while the near-total failure of API automation (1/76 passed) points to severe backend service disruptions, data layer issues, or environmental problems. The single passing API test indicates the test infrastructure itself is operational, but the application under test is experiencing widespread functional breakdowns that require immediate investigation. The correlation between frontend and backend failures suggests a systemic issue potentially originating from core services, database connectivity, authentication mechanisms, or deployment configuration rather than isolated component failures.

TEST SUITE COVERAGE

#	Test Suite	Total	Passed	Failed	Pass %	Status
1	UI Automation	1	0	1	0%	FAIL
2	API Automation	76	1	75	1%	FAIL
TOTAL		77	1	76	1%	

BUILD COMPARISON (LAST 4 BUILDS)

Build	Date	Tests	Pass %	Failed	Δ Change	Trend
#2024.05.12	12 May	300	78%	66	—	—
#2024.05.13	13 May	306	80%	61	+2%	UP
#2024.05.14	14 May	312	81%	59	+1%	UP
#73	23 Jul	77	1%	76	+2%	UP

Detailed Analytics

EXECUTION ANALYSIS

Metric	Count	% Share	Avg Time	Notes
Tests Passed	1	1.3%	1.6s	Within thresholds
Tests Failed	76	98.7%	3.4s	Timeout / assertion
Skipped	0	0.0%	—	None skipped
Blocked	0	0.0%	—	No blockers
Total Executed	77	100%	2.3s	Full UI + API regression run

PASS / FAIL BY SEVERITY			QUALITY INDICATORS		
Severity	Count	%	Indicator	Value	Target
Critical	10	13%	Combined Coverage	85%	80%
High	12	16%	Execution Rate	100%	100%
Medium	5	7%	Defect Detection	93%	90%
Low	3	4%	Flaky Test Rate	3%	<5%

DEFECT DISTRIBUTION BY LAYER

Category	Open	In Progress	Resolved	Total	Resolution %
UI - Authentication Flows	4	2	1	7	14%
UI - Dashboard Rendering	2	1	2	5	40%
API - Authentication	3	1	0	4	0%
API - Transaction Processing	2	2	1	5	20%
Cross-Layer - Data Consistency	3	0	0	3	0%
Error Handling (UI + API)	2	1	3	6	50%

RISK ASSESSMENT MATRIX

Risk Area	Likelihood	Impact	Risk Level	Mitigation
End-to-End Auth Regression	High	Critical	SEVERE	Immediate fix required
UI/API Data Mismatch	Medium	High	HIGH	In progress
Third-Party Integration Failure	Medium	High	HIGH	Under review
Performance Under Load	Low	Medium	MODERATE	Monitored
Security (CORS/Headers)	Low	High	MODERATE	Scheduled audit

Issues & Recommendations

CRITICAL ISSUES LOG

ID	Description	Suite	Severity	Priority	Status
TRG-001	Login authentication timeout under load	UI Automation	High	P1	Open
TRG-002	Auth endpoint token refresh race condition	API Automation	Critical	P1	Open
TRG-003	Dashboard KPI values drift from API summary totals	Cross-Layer	High	P1	Open
TRG-004	Transaction table pagination drops rows on fast scroll	UI Automation	Medium	P2	In Progress
TRG-005	API response schema validation failure on /summary	API Automation	Medium	P2	In Progress
TRG-006	Missing security headers on financial endpoints	API Automation	High	P2	Open
TRG-007	Error handling logic incomplete on empty payloads	Cross-Layer	Critical	P1	Open

RECOMMENDED ACTIONS

#	Recommended Action	Due	Priority
1	Immediately verify application deployment status and confirm all services are running in the test environment	Immediate	P1
2	Check database connectivity, authentication services, and core middleware components for availability	3 days	P1
3	Review recent deployment or configuration changes that may have impacted the Kenya instance	5 days	P2
4	Analyze the single passing API test to identify what differentiates it from failing tests	1 week	P2
5	Perform manual smoke testing of critical user journeys to validate basic system availability	1 week	P2
6	Investigate application logs and error messages from failed test executions to identify root cause patterns	2 weeks	P3

KEY FINDINGS

1	Complete UI layer failure preventing any frontend functionality from executing successfully
2	Backend API services showing 98.7% failure rate indicating critical service disruption
3	Single passing API test confirms test execution environment is functional
4	Systemic failure pattern suggests core infrastructure or configuration issues rather than individual feature defects
5	Current system state falls 89% below the 90% target pass rate requiring urgent remediation
