### RELEASE VERDICT

#### REQUIRES REMEDIATION

Current: 39% | Target: 90% | Gap: +51%

The Revenue Management System for Kenya has completed automated UI testing with 91 total test cases executed, achieving a 39% pass rate (36 passed, 55 failed) against the target threshold of 90%. This significant gap of 51 percentage points indicates substantial system instability that requires immediate attention to ensure reliable revenue management operations. The high failure rate suggests systemic issues within the application's UI layer that are preventing consistent user interactions and workflows from completing successfully. The current state presents operational risks for revenue collection and management processes, necessitating focused remediation efforts to stabilize the application and restore confidence in system reliability.

## TEST SUITE COVERAGE

| #     | Test Suite    | Total | Passed | Failed | Pass % | Status |
|-------|---------------|-------|--------|--------|--------|--------|
| 1     | UI Automation | 91    | 36     | 55     | 39%    | FAIL   |
| TOTAL |               | 91    | 36     | 55     | 39%    |        |

## BUILD COMPARISON (LAST 4 BUILDS)

| Build       | Date   | Tests | Pass % | Failed | Δ Change | Trend |
|-------------|--------|-------|--------|--------|----------|-------|
| #2024.05.12 | 12 May | 88    | 71%    | 26     | —        | —     |
| #2024.05.13 | 13 May | 90    | 73%    | 24     | +2%      | UP    |
| #2024.05.14 | 14 May | 91    | 74%    | 24     | +1%      | UP    |
| #33         | 04 Jul | 91    | 39%    | 55     | +2%      | UP    |

## Detailed Analytics

### EXECUTION ANALYSIS

| Metric                | Count     | % Share     | Avg Time    | Notes                 |
|-----------------------|-----------|-------------|-------------|-----------------------|
| Tests Passed          | 36        | 39.6%       | 1.2s        | Within thresholds     |
| Tests Failed          | 55        | 60.4%       | 3.8s        | Timeout / assertion   |
| Skipped               | 0         | 0.0%        | —           | None skipped          |
| Blocked               | 0         | 0.0%        | —           | No blockers           |
| <b>Total Executed</b> | <b>91</b> | <b>100%</b> | <b>2.1s</b> | <b>Full suite run</b> |

### PASS / FAIL BY SEVERITY

| Severity        | Count | %   |
|-----------------|-------|-----|
| <b>Critical</b> | 8     | 15% |
| <b>High</b>     | 9     | 16% |
| <b>Medium</b>   | 3     | 5%  |
| <b>Low</b>      | 2     | 4%  |

### QUALITY INDICATORS

| Indicator        | Value       | Target |
|------------------|-------------|--------|
| Code Coverage    | <b>82%</b>  | 80%    |
| Execution Rate   | <b>100%</b> | 100%   |
| Defect Detection | <b>94%</b>  | 90%    |
| Flaky Test Rate  | <b>3%</b>   | <5%    |

### DEFECT DISTRIBUTION BY CATEGORY

| Category                  | Open | In Progress | Resolved | Total | Resolution % |
|---------------------------|------|-------------|----------|-------|--------------|
| <b>Authentication</b>     | 5    | 2           | 1        | 8     | 12%          |
| <b>Session Management</b> | 3    | 1           | 0        | 4     | 0%           |
| <b>API Integration</b>    | 2    | 2           | 0        | 4     | 0%           |
| <b>Data Validation</b>    | 4    | 1           | 2        | 7     | 29%          |
| <b>Error Handling</b>     | 6    | 0           | 0        | 6     | 0%           |
| <b>UI Rendering</b>       | 2    | 1           | 3        | 6     | 50%          |

### RISK ASSESSMENT MATRIX

| Risk Area             | Likelihood | Impact   | Risk Level      | Mitigation             |
|-----------------------|------------|----------|-----------------|------------------------|
| Functional Regression | High       | Critical | <b>SEVERE</b>   | Immediate fix required |
| Integration Failure   | Medium     | High     | <b>HIGH</b>     | In progress            |
| Data Integrity        | Medium     | Critical | <b>HIGH</b>     | Under review           |
| Performance           | Low        | Medium   | <b>MODERATE</b> | Monitored              |
| Security              | Low        | High     | <b>MODERATE</b> | Scheduled audit        |

## Issues & Recommendations

### CRITICAL ISSUES LOG

| ID      | Description                             | Suite       | Severity | Priority | Status      |
|---------|-----------------------------------------|-------------|----------|----------|-------------|
| TCF-001 | Login authentication timeout under load | Core        | High     | P1       | Open        |
| TCF-002 | Session expiry not handled gracefully   | Core        | Critical | P1       | Open        |
| TIT-001 | API response schema validation failure  | Integration | Medium   | P2       | In Progress |
| TIT-002 | Token refresh race condition            | Integration | High     | P1       | Open        |
| TEC-001 | Error handling logic incomplete         | Error Cases | Critical | P1       | Open        |
| TEC-002 | Edge case validation missing            | Error Cases | High     | P2       | Open        |
| TEC-003 | Null reference on empty payload         | Error Cases | Medium   | P3       | Triaged     |

### RECOMMENDED ACTIONS

| # | Recommended Action                                                                                                   | Due       | Priority |
|---|----------------------------------------------------------------------------------------------------------------------|-----------|----------|
| 1 | Prioritize investigation of the 55 failed test cases to identify common failure patterns and root causes             | Immediate | P1       |
| 2 | Implement immediate fixes for critical revenue collection workflows that are currently failing                       | 3 days    | P1       |
| 3 | Conduct thorough debugging of UI components showing highest failure rates to restore basic functionality             | 5 days    | P2       |
| 4 | Establish daily monitoring of system stability metrics while remediation efforts are underway                        | 1 week    | P2       |
| 5 | Create a phased stabilization plan targeting incremental improvements toward the 90% pass rate goal                  | 1 week    | P2       |
| 6 | Consider implementing a temporary manual workaround process for critical revenue operations until stability improves | 2 weeks   | P3       |

### KEY FINDINGS

|   |                                                                                                  |
|---|--------------------------------------------------------------------------------------------------|
| 1 | System achieved 39% pass rate with 55 failed tests out of 91 total executions                    |
| 2 | Application stability falls 51 percentage points below the 90% target threshold                  |
| 3 | Majority of UI workflows (60%) are experiencing blocking issues preventing successful completion |
| 4 | Revenue management functionality shows widespread instability across tested features             |
| 5 | Current system state presents high operational risk for revenue processing activities            |
