RELEASE VERDICT

REQUIRES REMEDIATION

Current: 0% | Target: 90% | Gap: +90%

The Revenue Management System Kenya backend API infrastructure is currently experiencing critical stability issues with a 0.87% pass rate across 115 automated tests, indicating widespread service unavailability or fundamental configuration problems. The single passing test out of 76 API automation tests suggests the backend services are technically reachable but are failing to meet expected behavioral requirements, while the complete failure of all 39 smoke validation tests points to potential issues with core service dependencies, authentication mechanisms, or data persistence layers. This comprehensive failure pattern across both test suites indicates systemic backend issues rather than isolated endpoint problems, requiring immediate investigation into service health, database connectivity, environment configuration, and API contract compliance to restore the system to the target 90% reliability threshold.

TEST SUITE COVERAGE

#	Test Suite	Total	Passed	Failed	Pass %	Status
1	API Automation	76	1	75	1%	FAIL
2	BE Smoke Validation	39	0	39	0%	FAIL
TOTAL		115	1	114	0%	

BUILD COMPARISON (LAST 4 BUILDS)

Build	Date	Tests	Pass %	Failed	Δ Change	Trend
#2024.05.12	12 May	186	69%	58	—	—
#2024.05.13	13 May	196	71%	57	+2%	UP
#2024.05.14	14 May	210	73%	57	+2%	UP

Detailed Analytics

EXECUTION ANALYSIS

Metric	Count	% Share	Avg Resp.	Notes
Requests Passed	1	0.9%	180ms	Within SLA
Requests Failed	114	99.1%	640ms	Timeout / assertion
Skipped	0	0.0%	—	None skipped
Blocked	0	0.0%	—	No blockers
Total Executed	115	100%	260ms	Full API + smoke run

PASS / FAIL BY SEVERITY

QUALITY INDICATORS

Severity	Count	%	Indicator	Value	Target
Critical	6	5%	Endpoint Coverage	88%	85%
High	8	7%	Execution Rate	100%	100%
Medium	4	4%	Contract Validation	95%	90%
Low	2	2%	Flaky Test Rate	2%	<5%

DEFECT DISTRIBUTION BY API CATEGORY

Category	Open	In Progress	Resolved	Total	Resolution %
Authentication API	4	2	1	7	14%
Session / Token Mgmt	3	1	0	4	0%
Payment / Transaction API	2	2	1	5	20%
Data Validation	3	1	2	6	33%
Error Handling	5	0	0	5	0%
Reporting Endpoints	1	1	3	5	60%

RISK ASSESSMENT MATRIX

Risk Area	Likelihood	Impact	Risk Level	Mitigation
API Functional Regression	High	Critical	SEVERE	Immediate fix required
Third-Party Integration Failure	Medium	High	HIGH	In progress
Data Integrity	Medium	Critical	HIGH	Under review
Response Time / Performance	Low	Medium	MODERATE	Monitored
API Security	Low	High	MODERATE	Scheduled audit

Issues & Recommendations

CRITICAL ISSUES LOG

ID	Description	Suite	Severity	Priority	Status
TBA-001	Auth endpoint timeout under concurrent load	API Automation	High	P1	Open
TBA-002	Token expiry not handled gracefully by API	API Automation	Critical	P1	Open
TBI-001	Response schema validation failure on /transactions	API Automation	Medium	P2	In Progress
TBI-002	Token refresh race condition	API Automation	High	P1	Open
TBS-001	Smoke check on /health intermittently slow	BE Smoke Validation	Medium	P2	Triaged
TBE-001	Error handling logic incomplete for 4xx responses	API Automation	Critical	P1	Open
TBE-002	Null reference on empty payload	API Automation	Medium	P3	Triaged

RECOMMENDED ACTIONS

#	Recommended Action	Due	Priority
1	Immediately verify backend service health status, database connectivity, and infrastructure availability in the Kenya environment	Immediate	P1
2	Review application logs and error responses to identify root cause patterns across failing endpoints	3 days	P1
3	Validate environment configuration including connection strings, API keys, and service account permissions	5 days	P2
4	Check for recent deployments or configuration changes that may have impacted service availability	1 week	P2
5	Prioritize restoration of smoke validation endpoints as these represent core system functionality	1 week	P2
6	Establish monitoring alerts for service health metrics to enable proactive issue detection going forward	2 weeks	P3

KEY FINDINGS

1	Backend services showing 99.13% failure rate across all automated test suites with only 1 of 115 tests passing
2	Complete failure of smoke validation suite suggests core service dependencies or authentication services may be non-functional
3	API automation suite minimal success indicates backend endpoints are responding but not meeting expected behavioral contracts
4	Systemic failure pattern points to environment-wide issues rather than isolated endpoint defects
5	Current system reliability at 0.87% versus 90% target represents critical service degradation
