RELEASE VERDICT

NEEDS ATTENTION

Current: 86% | Target: 90% | Gap: +4%

The Revenue Management System for Kenya completed automated UI testing with 64 of 74 tests passing, achieving an 86% pass rate against a 90% target. The system demonstrates solid core functionality with the majority of user interface components performing as expected. The 10 failed tests indicate specific areas where the application behavior deviates from expected outcomes, presenting opportunities for targeted improvements. These results provide valuable insights into system stability and highlight discrete functional areas requiring attention before the pass rate target can be achieved.

RECOMMENDED ACTIONS

#	Recommended Action	Due	Priority
1	Analyze the 10 failed test cases to identify common failure patterns or affected modules	Immediate	P1
2	Prioritize fixes based on business impact and frequency of affected user workflows	3 days	P1
3	Implement targeted code changes to address root causes of identified failures	5 days	P2
4	Conduct focused regression testing on remediated areas to validate fixes	1 week	P2
5	Review application logs and error patterns to identify potential systemic issues	1 week	P2
6	Schedule re-execution of full test suite after remediation to confirm target achievement	2 weeks	P3

KEY FINDINGS

1	System achieved 86% pass rate with 64 successful test executions out of 74 total tests
2	10 test failures indicate specific application behaviors requiring investigation and remediation
3	4% gap from the 90% target pass rate represents focused improvement opportunity
4	Majority of UI components and workflows are functioning within expected parameters
5	Test coverage spans 74 distinct UI scenarios providing comprehensive system validation
