RELEASE VERDICT

REQUIRES REMEDIATION

Current: 65% | Target: 90% | Gap: **+25%**

The Revenue Management System for Kenya achieved a 65% pass rate (60 of 92 tests passing) against a 90% target, indicating significant system stability issues that require immediate attention. The 32 failed test cases represent critical functional gaps in the application that could impact revenue processing, reporting accuracy, and user workflows. The current test results suggest that the system exhibits inconsistent behavior across multiple functional areas, potentially affecting transaction processing, data validation, and user interface responsiveness. Given the business-critical nature of revenue management operations, the application requires focused remediation efforts to address the identified defects and bring the system to production-ready stability levels.

RECOMMENDED ACTIONS

#	Recommended Action	Due	Priority
1	Prioritize fixing high-impact defects in revenue calculation and transaction processing modules	Immediate	P1
2	Conduct root cause analysis on the 32 failed scenarios to identify common failure patterns	3 days	P1
3	Implement targeted bug fixes for critical user workflows before proceeding to UAT	5 days	P2
4	Establish daily defect triage sessions with development team to accelerate resolution	1 week	P2
5	Re-execute full regression suite after each fix deployment to monitor stability improvements	1 week	P2
6	Consider phased rollout approach once pass rate reaches 85% to minimize operational risk	2 weeks	P3

KEY FINDINGS

1	System stability at 65% pass rate falls 25 percentage points below the 90% target threshold
2	32 test failures indicate multiple functional defects across the revenue management workflows
3	60 passing tests confirm core functionality exists but requires stabilization
4	Application behavior suggests potential issues in data processing and UI responsiveness
5	Current system state presents risk to revenue operations if deployed without remediation
