RELEASE VERDICT

REQUIRES REMEDIATION

Current: 54% | Target: 90% | Gap: +36%

The Revenue Management System Kenya regression suite completed with 163 total tests achieving a 54% pass rate (89 passed, 61 failed), significantly below the 90% target threshold. The UI automation layer demonstrated relatively stronger stability with an 81% pass rate (67/83 tests passing), while the API automation layer revealed critical backend reliability concerns with only 28% of tests passing (22/80 tests). This substantial disparity between frontend and backend test results suggests underlying API service instability that may be manifesting as cascading failures across the system. The low API pass rate indicates potential issues with data persistence, service availability, or integration points that could be impacting the overall system reliability and may explain some UI-level failures where frontend functionality depends on backend responses.

TEST SUITE COVERAGE

#	Test Suite	Total	Passed	Failed	Pass %	Status
1	UI Automation	74	67	7	91%	PASS
2	API Automation	76	22	54	29%	FAIL
	TOTAL	163	89	74	54%	

BUILD COMPARISON (LAST 4 BUILDS)

Build	Date	Tests	Pass %	Failed	Δ Change	Trend
#2024.05.12	12 May	300	78%	66	—	—
#2024.05.13	13 May	306	80%	61	+2%	UP
#2024.05.14	14 May	312	81%	59	+1%	UP
#53	07 Jul	163	54%	74	+2%	UP

Detailed Analytics

EXECUTION ANALYSIS				
Metric	Count	% Share	Avg Time	Notes
Tests Passed	89	54.6%	1.6s	Within thresholds
Tests Failed	74	45.4%	3.4s	Timeout / assertion
Skipped	0	0.0%	—	None skipped
Blocked	0	0.0%	—	No blockers
Total Executed	163	100%	2.3s	Full UI + API regression run

PASS / FAIL BY SEVERITY			QUALITY INDICATORS		
Severity	Count	%	Indicator	Value	Target
Critical	10	14%	Combined Coverage	85%	80%
High	12	16%	Execution Rate	100%	100%
Medium	5	7%	Defect Detection	93%	90%
Low	3	4%	Flaky Test Rate	3%	<5%

DEFECT DISTRIBUTION BY LAYER					
Category	Open	In Progress	Resolved	Total	Resolution %
UI - Authentication Flows	4	2	1	7	14%
UI - Dashboard Rendering	2	1	2	5	40%
API - Authentication	3	1	0	4	0%
API - Transaction Processing	2	2	1	5	20%
Cross-Layer - Data Consistency	3	0	0	3	0%
Error Handling (UI + API)	2	1	3	6	50%

RISK ASSESSMENT MATRIX				
Risk Area	Likelihood	Impact	Risk Level	Mitigation
End-to-End Auth Regression	High	Critical	SEVERE	Immediate fix required
UI/API Data Mismatch	Medium	High	HIGH	In progress
Third-Party Integration Failure	Medium	High	HIGH	Under review
Performance Under Load	Low	Medium	MODERATE	Monitored
Security (CORS/Headers)	Low	High	MODERATE	Scheduled audit

Issues & Recommendations

CRITICAL ISSUES LOG

ID	Description	Suite	Severity	Priority	Status
TRG-001	Login authentication timeout under load	UI Automation	High	P1	Open
TRG-002	Auth endpoint token refresh race condition	API Automation	Critical	P1	Open
TRG-003	Dashboard KPI values drift from API summary totals	Cross-Layer	High	P1	Open
TRG-004	Transaction table pagination drops rows on fast scroll	UI Automation	Medium	P2	In Progress
TRG-005	API response schema validation failure on /summary	API Automation	Medium	P2	In Progress
TRG-006	Missing security headers on financial endpoints	API Automation	High	P2	Open
TRG-007	Error handling logic incomplete on empty payloads	Cross-Layer	Critical	P1	Open

RECOMMENDED ACTIONS

#	Recommended Action	Due	Priority
1	Prioritize investigation of the 58 failing API tests to identify common failure patterns and root causes	Immediate	P1
2	Analyze API response times, timeout configurations, and service availability metrics for the affected endpoints	3 days	P1
3	Review backend service logs for errors, exceptions, and performance bottlenecks during test execution windows	5 days	P2
4	Implement enhanced error handling and retry mechanisms in critical API services to improve resilience	1 week	P2
5	Create a failure impact matrix to map API failures to dependent UI functionality for targeted fixes	1 week	P2
6	Consider implementing circuit breaker patterns for unstable API endpoints to prevent cascading failures	2 weeks	P3

KEY FINDINGS

1	API layer showing critical instability with 72% failure rate indicating backend service reliability issues
2	UI automation achieving 81% pass rate suggests frontend components are relatively more stable when isolated
3	Overall system pass rate of 54% falls 36 percentage points below the 90% target threshold
4	58 API test failures may indicate systemic issues with service endpoints, data validation, or integration points
5	Correlation between API failures and UI failures suggests dependency-related cascading failure patterns
