RELEASE VERDICT

REQUIRES REMEDIATION

Current: 0% | Target: 90% | Gap: **+90%**

The Revenue Management System for Kenya currently shows a 0% pass rate with the single automated UI test failing, significantly below the 90% target threshold. This indicates a critical blocking issue preventing successful test execution, which requires immediate investigation to identify whether the root cause stems from environmental factors, application defects, or configuration misalignment. The complete failure suggests a systemic issue rather than isolated functionality problems, potentially impacting core revenue management operations. Given the business-critical nature of revenue systems, prioritizing the resolution of this blocking issue is essential to restore system validation capabilities and ensure the application meets operational requirements.

RECOMMENDED ACTIONS

#	Recommended Action	Due	Priority
1	Perform immediate root cause analysis on the failed test to identify blocking issue	Immediate	P1
2	Verify application deployment status and environment configuration for Kenya instance	3 days	P1
3	Check application logs and error messages for system exceptions or connectivity issues	5 days	P2
4	Validate UI element availability and responsiveness in the Revenue Management interface	1 week	P2
5	Review recent application changes or deployments that may have impacted functionality	1 week	P2
6	Execute manual smoke test to confirm basic application accessibility and core features	2 weeks	P3

KEY FINDINGS

1	Single UI automation test execution resulted in 100% failure rate
2	System performance at 0% pass rate versus 90% target indicates critical blocker
3	Complete test failure suggests systemic rather than isolated functionality issues
4	Revenue Management System Kenya module unable to complete basic UI validation
5	Current state prevents verification of core revenue management features
