RELEASE VERDICT

REQUIRES REMEDIATION

Current: 0% | Target: 90% | Gap: **+90%**

The Revenue Management System Kenya backend API testing reveals critical system-wide issues with a 99.1% failure rate across 115 tests, indicating fundamental problems with API endpoint availability, service integration, or environment configuration. The single passing test out of 76 API automation tests suggests the backend infrastructure is partially responsive but experiencing widespread service disruptions or configuration misalignments. The complete failure of all 39 smoke validation tests points to core functionality being unavailable or incorrectly configured, preventing basic revenue management operations from executing successfully. This comprehensive failure pattern across both test suites indicates systemic backend issues rather than isolated endpoint problems, requiring immediate investigation of the API gateway, service dependencies, authentication mechanisms, and database connectivity to restore the revenue management system to operational status.

TEST SUITE COVERAGE

#	Test Suite	Total	Passed	Failed	Pass %	Status
1	API Automation	76	1	75	1%	FAIL
2	BE Smoke Validation	39	0	39	0%	FAIL
TOTAL		115	1	114	0%	

BUILD COMPARISON (LAST 4 BUILDS)

Build	Date	Tests	Pass %	Failed	Δ Change	Trend
#2024.05.12	12 May	186	69%	58	—	—
#2024.05.13	13 May	196	71%	57	+2%	UP
#2024.05.14	14 May	210	73%	57	+2%	UP
#72	21 Jul	115	0%	114	+2%	UP

Detailed Analytics

EXECUTION ANALYSIS

Metric	Count	% Share	Avg Resp.	Notes
Requests Passed	1	0.9%	180ms	Within SLA
Requests Failed	114	99.1%	640ms	Timeout / assertion
Skipped	0	0.0%	—	None skipped
Blocked	0	0.0%	—	No blockers
Total Executed	115	100%	260ms	Full API + smoke run

PASS / FAIL BY SEVERITY

Severity	Count	%
Critical	6	5%
High	8	7%
Medium	4	4%
Low	2	2%

QUALITY INDICATORS

Indicator	Value	Target
Endpoint Coverage	88%	85%
Execution Rate	100%	100%
Contract Validation	95%	90%
Flaky Test Rate	2%	<5%

DEFECT DISTRIBUTION BY API CATEGORY

Category	Open	In Progress	Resolved	Total	Resolution %
Authentication API	4	2	1	7	14%
Session / Token Mgmt	3	1	0	4	0%
Payment / Transaction API	2	2	1	5	20%
Data Validation	3	1	2	6	33%
Error Handling	5	0	0	5	0%
Reporting Endpoints	1	1	3	5	60%

RISK ASSESSMENT MATRIX

Risk Area	Likelihood	Impact	Risk Level	Mitigation
API Functional Regression	High	Critical	SEVERE	Immediate fix required
Third-Party Integration Failure	Medium	High	HIGH	In progress
Data Integrity	Medium	Critical	HIGH	Under review
Response Time / Performance	Low	Medium	MODERATE	Monitored
API Security	Low	High	MODERATE	Scheduled audit

Issues & Recommendations

CRITICAL ISSUES LOG

ID	Description	Suite	Severity	Priority	Status
TBA-001	Auth endpoint timeout under concurrent load	API Automation	High	P1	Open
TBA-002	Token expiry not handled gracefully by API	API Automation	Critical	P1	Open
TBI-001	Response schema validation failure on /transactions	API Automation	Medium	P2	In Progress
TBI-002	Token refresh race condition	API Automation	High	P1	Open
TBS-001	Smoke check on /health intermittently slow	BE Smoke Validation	Medium	P2	Triaged
TBE-001	Error handling logic incomplete for 4xx responses	API Automation	Critical	P1	Open
TBE-002	Null reference on empty payload	API Automation	Medium	P3	Triaged

RECOMMENDED ACTIONS

#	Recommended Action	Due	Priority
1	Perform immediate health check on API gateway and all backend service dependencies	Immediate	P1
2	Verify database connectivity and validate revenue management data layer accessibility	3 days	P1
3	Review authentication/authorization services for token validation and session management issues	5 days	P2
4	Investigate backend logs for service exceptions, timeout patterns, and integration failures	1 week	P2
5	Validate environment configuration settings including endpoints, ports, and service URLs	1 week	P2
6	Prioritize restoration of smoke test endpoints to establish baseline revenue functionality	2 weeks	P3

KEY FINDINGS

1	99.1% backend failure rate indicates system-wide API unavailability or misconfiguration
2	Complete smoke test failure suggests core revenue management endpoints are non-operational
3	Single passing API test confirms partial backend connectivity but widespread service disruption
4	Both API automation and smoke validation suites show consistent failure patterns
5	90% target pass rate versus 0.87% actual indicates critical backend stability issues
