RELEASE VERDICT

REQUIRES REMEDIATION

Current: 47% | Target: 90% | Gap: +43%

The Revenue Management System Kenya regression suite completed with 163 tests executing, achieving a 47% pass rate (77 passed, 74 failed) against the 90% target threshold. The results indicate systemic issues across both UI and API layers, with API automation showing particularly low stability at 27.5% pass rate (22/80 passed) and UI automation at 66.3% pass rate (55/83 passed). The significantly degraded API layer performance suggests underlying backend service issues that are likely cascading to frontend functionality, as UI components typically depend on API responses for data presentation and business logic execution. The correlation between low API reliability and UI test failures points to potential service integration problems, data consistency issues, or infrastructure instability affecting the overall application stack.

TEST SUITE COVERAGE

#	Test Suite	Total	Passed	Failed	Pass %	Status
1	UI Automation	75	55	20	73%	WARN
2	API Automation	76	22	54	29%	FAIL
	TOTAL	163	77	86	47%	

BUILD COMPARISON (LAST 4 BUILDS)

Build	Date	Tests	Pass %	Failed	Δ Change	Trend

#59	10 Jul	163	47%	86	+2%	UP

Detailed Analytics

EXECUTION ANALYSIS				
Metric	Count	% Share	Avg Time	Notes
Tests Passed	77	47.2%	1.6s	Within thresholds
Tests Failed	86	52.8%	3.4s	Timeout / assertion
Skipped	0	0.0%	—	None skipped
Blocked	0	0.0%	—	No blockers
Total Executed	163	100%	2.3s	Full UI + API regression run

PASS / FAIL BY SEVERITY			QUALITY INDICATORS		
Severity	Count	%	Indicator	Value	Target
Critical	10	12%	Combined Coverage	85%	80%
High	12	14%	Execution Rate	100%	100%
Medium	5	6%	Defect Detection	93%	90%
Low	3	3%	Flaky Test Rate	3%	<5%

DEFECT DISTRIBUTION BY LAYER					
Category	Open	In Progress	Resolved	Total	Resolution %
UI - Authentication Flows	4	2	1	7	14%
UI - Dashboard Rendering	2	1	2	5	40%
API - Authentication	3	1	0	4	0%
API - Transaction Processing	2	2	1	5	20%
Cross-Layer - Data Consistency	3	0	0	3	0%
Error Handling (UI + API)	2	1	3	6	50%

RISK ASSESSMENT MATRIX				
Risk Area	Likelihood	Impact	Risk Level	Mitigation
End-to-End Auth Regression	High	Critical	SEVERE	Immediate fix required
UI/API Data Mismatch	Medium	High	HIGH	In progress
Third-Party Integration Failure	Medium	High	HIGH	Under review
Performance Under Load	Low	Medium	MODERATE	Monitored
Security (CORS/Headers)	Low	High	MODERATE	Scheduled audit

Issues & Recommendations

CRITICAL ISSUES LOG

ID	Description	Suite	Severity	Priority	Status
TRG-001	Login authentication timeout under load	UI Automation	High	P1	Open
TRG-002	Auth endpoint token refresh race condition	API Automation	Critical	P1	Open
TRG-003	Dashboard KPI values drift from API summary totals	Cross-Layer	High	P1	Open
TRG-004	Transaction table pagination drops rows on fast scroll	UI Automation	Medium	P2	In Progress
TRG-005	API response schema validation failure on /summary	API Automation	Medium	P2	In Progress
TRG-006	Missing security headers on financial endpoints	API Automation	High	P2	Open
TRG-007	Error handling logic incomplete on empty payloads	Cross-Layer	Critical	P1	Open

RECOMMENDED ACTIONS

#	Recommended Action	Due	Priority
1	Prioritize root cause analysis of API failures, focusing on service endpoints with highest failure rates	Immediate	P1
2	Review application logs and monitoring data to identify backend service errors, timeouts, or data inconsistencies	3 days	P1
3	Validate database integrity and connection pool configurations for the Kenya environment	5 days	P2
4	Perform manual verification of critical business workflows to isolate automation-specific vs application defects	1 week	P2
5	Implement temporary service health checks before executing UI tests to reduce cascading failures	1 week	P2
6	Schedule focused debugging session with development team to address top failing API endpoints and their UI dependencies	2 weeks	P3

KEY FINDINGS

1	API layer experiencing critical stability issues with only 27.5% tests passing, indicating backend service degradation
2	UI automation showing moderate performance at 66.3% pass rate, likely impacted by underlying API failures
3	System-wide pass rate of 47% represents a 43 percentage point gap from the 90% target threshold
4	Cross-layer dependency failures suggest API instability is propagating to UI functionality
5	Both frontend and backend components require immediate investigation to restore system reliability
