RELEASE VERDICT

REQUIRES REMEDIATION

Current: 50% | Target: 90% | Gap: +40%

The Revenue Management System Kenya regression suite completed with 172 tests yielding a 50% pass rate (86 passed, 80 failed), significantly below the 90% target threshold. The UI automation layer showed 64% pass rate (59/92 tests) while the API automation layer demonstrated concerning stability at 34% pass rate (27/80 tests). The substantially lower API pass rate suggests potential backend service instability or data consistency issues that may be cascading to impact frontend functionality. The correlation between backend failures and UI test results indicates that many UI failures could be symptomatic of underlying API or service layer defects rather than isolated frontend issues. This pattern suggests the application requires immediate attention to backend service reliability and data integrity before achieving target stability levels.

TEST SUITE COVERAGE

#	Test Suite	Total	Passed	Failed	Pass %	Status
1	UI Automation	91	59	32	65%	WARN
2	API Automation	75	27	48	36%	FAIL
	TOTAL	172	86	86	50%	

BUILD COMPARISON (LAST 4 BUILDS)

Build	Date	Tests	Pass %	Failed	Δ Change	Trend
#2024.05.12	12 May	300	78%	66	—	—
#2024.05.13	13 May	306	80%	61	+2%	UP
#2024.05.14	14 May	312	81%	59	+1%	UP

Detailed Analytics

EXECUTION ANALYSIS				
Metric	Count	% Share	Avg Time	Notes
Tests Passed	86	50.0%	1.6s	Within thresholds
Tests Failed	86	50.0%	3.4s	Timeout / assertion
Skipped	0	0.0%	—	None skipped
Blocked	0	0.0%	—	No blockers
Total Executed	172	100%	2.3s	Full UI + API regression run

PASS / FAIL BY SEVERITY			QUALITY INDICATORS		
Severity	Count	%	Indicator	Value	Target
Critical	10	12%	Combined Coverage	85%	80%
High	12	14%	Execution Rate	100%	100%
Medium	5	6%	Defect Detection	93%	90%
Low	3	3%	Flaky Test Rate	3%	<5%

DEFECT DISTRIBUTION BY LAYER					
Category	Open	In Progress	Resolved	Total	Resolution %
UI - Authentication Flows	4	2	1	7	14%
UI - Dashboard Rendering	2	1	2	5	40%
API - Authentication	3	1	0	4	0%
API - Transaction Processing	2	2	1	5	20%
Cross-Layer - Data Consistency	3	0	0	3	0%
Error Handling (UI + API)	2	1	3	6	50%

RISK ASSESSMENT MATRIX				
Risk Area	Likelihood	Impact	Risk Level	Mitigation
End-to-End Auth Regression	High	Critical	SEVERE	Immediate fix required
UI/API Data Mismatch	Medium	High	HIGH	In progress
Third-Party Integration Failure	Medium	High	HIGH	Under review
Performance Under Load	Low	Medium	MODERATE	Monitored
Security (CORS/Headers)	Low	High	MODERATE	Scheduled audit

Issues & Recommendations

CRITICAL ISSUES LOG

ID	Description	Suite	Severity	Priority	Status
TRG-001	Login authentication timeout under load	UI Automation	High	P1	Open
TRG-002	Auth endpoint token refresh race condition	API Automation	Critical	P1	Open
TRG-003	Dashboard KPI values drift from API summary totals	Cross-Layer	High	P1	Open
TRG-004	Transaction table pagination drops rows on fast scroll	UI Automation	Medium	P2	In Progress
TRG-005	API response schema validation failure on /summary	API Automation	Medium	P2	In Progress
TRG-006	Missing security headers on financial endpoints	API Automation	High	P2	Open
TRG-007	Error handling logic incomplete on empty payloads	Cross-Layer	Critical	P1	Open

RECOMMENDED ACTIONS

#	Recommended Action	Due	Priority
1	Prioritize investigation of the 53 failing API tests to identify common failure patterns and root causes in backend services	Immediate	P1
2	Perform detailed analysis of API response times, timeout configurations, and service availability for the Kenya environment	3 days	P1
3	Review application logs and monitoring data to identify backend service errors, database connectivity issues, or data inconsistencies	5 days	P2
4	Implement enhanced error handling and retry mechanisms in critical API endpoints to improve service resilience	1 week	P2
5	Validate environment configuration and data setup specific to Kenya deployment for potential regional setting issues	1 week	P2
6	Execute focused debugging sessions on high-impact API failures that directly affect UI functionality to resolve cascading failures	2 weeks	P3

KEY FINDINGS

1	API layer showing critical instability with only 34% pass rate indicating potential service reliability or data consistency issues
2	UI automation achieving 64% pass rate suggests frontend components are relatively more stable than backend services
3	40% gap from target pass rate indicates significant application stability concerns requiring systematic remediation
4	High correlation between API failures and UI test failures suggests cascading impact from backend to frontend layers
5	System integration points between UI and API layers appear to be experiencing synchronization or communication failures
