RELEASE VERDICT

REQUIRES REMEDIATION

Current: 67% | Target: 90% | Gap: +23%

The Revenue Management System UI automation suite executed 92 tests with a 67% pass rate (62 passed, 30 failed), indicating significant functional gaps requiring immediate attention to meet the 90% target threshold. The 30 test failures suggest potential instability in core revenue management workflows, user interface components, or data handling mechanisms that could impact system reliability and user experience. The current state presents a 23 percentage point deficit from the quality gate, necessitating focused remediation efforts on the failing scenarios to ensure the system meets production readiness criteria and maintains expected revenue processing capabilities.

RECOMMENDED ACTIONS

#	Recommended Action	Due	Priority
1	Prioritize investigation of the 30 failing test scenarios to identify root cause patterns	Immediate	P1
2	Implement fixes for high-impact revenue calculation and display components first	3 days	P1
3	Stabilize UI element interactions and timing issues affecting test execution	5 days	P2
4	Address data validation and boundary condition handling in failed workflows	1 week	P2
5	Verify integration points between UI and backend revenue services for consistency	1 week	P2
6	Schedule targeted regression testing after fixes to validate improvement trajectory	2 weeks	P3

KEY FINDINGS

1	System achieved 67% pass rate with 30 critical test failures blocking target compliance
2	23 percentage point gap exists between current performance and 90% quality threshold
3	Multiple UI components appear unstable based on the 33% failure rate pattern
4	Revenue management workflows show potential regression or incomplete implementation
5	System stability concerns indicated by elevated failure count across test scenarios
