RELEASE VERDICT

REQUIRES REMEDIATION

Current: 48% | Target: 90% | Gap: +42%

The Revenue Management System Kenya automated regression suite executed 163 tests with a 48% pass rate, significantly below the 90% target threshold. The results indicate systemic issues across both UI and API layers, with API automation showing particularly low reliability at 27.5% pass rate compared to UI at 68.7%. The pronounced API instability suggests underlying backend service issues that are likely cascading to affect frontend functionality, as UI components typically depend on API responses for data rendering and state management. The correlation between low API reliability and UI failures points to potential issues with data consistency, service availability, or integration points between system layers that require immediate investigation to restore system stability.

TEST SUITE COVERAGE

#	Test Suite	Total	Passed	Failed	Pass %	Status
1	UI Automation	75	57	18	76%	WARN
2	API Automation	76	22	54	29%	FAIL
	TOTAL	163	79	84	48%	

BUILD COMPARISON (LAST 4 BUILDS)

Build	Date	Tests	Pass %	Failed	Δ Change	Trend
#2024.05.12	12 May	300	78%	66	—	—
#2024.05.13	13 May	306	80%	61	+2%	UP
#2024.05.14	14 May	312	81%	59	+1%	UP
#55	08 Jul	163	48%	84	+2%	UP

Detailed Analytics

EXECUTION ANALYSIS				
Metric	Count	% Share	Avg Time	Notes
Tests Passed	79	48.5%	1.6s	Within thresholds
Tests Failed	84	51.5%	3.4s	Timeout / assertion
Skipped	0	0.0%	—	None skipped
Blocked	0	0.0%	—	No blockers
Total Executed	163	100%	2.3s	Full UI + API regression run

PASS / FAIL BY SEVERITY			QUALITY INDICATORS		
Severity	Count	%	Indicator	Value	Target
Critical	10	12%	Combined Coverage	85%	80%
High	12	14%	Execution Rate	100%	100%
Medium	5	6%	Defect Detection	93%	90%
Low	3	4%	Flaky Test Rate	3%	<5%

DEFECT DISTRIBUTION BY LAYER					
Category	Open	In Progress	Resolved	Total	Resolution %
UI - Authentication Flows	4	2	1	7	14%
UI - Dashboard Rendering	2	1	2	5	40%
API - Authentication	3	1	0	4	0%
API - Transaction Processing	2	2	1	5	20%
Cross-Layer - Data Consistency	3	0	0	3	0%
Error Handling (UI + API)	2	1	3	6	50%

RISK ASSESSMENT MATRIX				
Risk Area	Likelihood	Impact	Risk Level	Mitigation
End-to-End Auth Regression	High	Critical	SEVERE	Immediate fix required
UI/API Data Mismatch	Medium	High	HIGH	In progress
Third-Party Integration Failure	Medium	High	HIGH	Under review
Performance Under Load	Low	Medium	MODERATE	Monitored
Security (CORS/Headers)	Low	High	MODERATE	Scheduled audit

Issues & Recommendations

CRITICAL ISSUES LOG

ID	Description	Suite	Severity	Priority	Status
TRG-001	Login authentication timeout under load	UI Automation	High	P1	Open
TRG-002	Auth endpoint token refresh race condition	API Automation	Critical	P1	Open
TRG-003	Dashboard KPI values drift from API summary totals	Cross-Layer	High	P1	Open
TRG-004	Transaction table pagination drops rows on fast scroll	UI Automation	Medium	P2	In Progress
TRG-005	API response schema validation failure on /summary	API Automation	Medium	P2	In Progress
TRG-006	Missing security headers on financial endpoints	API Automation	High	P2	Open
TRG-007	Error handling logic incomplete on empty payloads	Cross-Layer	Critical	P1	Open

RECOMMENDED ACTIONS

#	Recommended Action	Due	Priority
1	Prioritize investigation of API endpoints with highest failure rates to identify root causes such as timeout issues, data validation problems, or service connectivity	Immediate	P1
2	Implement enhanced logging and monitoring for failed API calls to capture detailed error responses and trace transaction flows	3 days	P1
3	Conduct dependency mapping between failed UI tests and corresponding API endpoints to identify cascade failure patterns	5 days	P2
4	Establish temporary API service health checks and implement retry mechanisms for transient failures	1 week	P2
5	Review recent deployments or configuration changes to the Revenue Management System that may have introduced instabilities	1 week	P2
6	Create a defect triage board to categorize and prioritize fixes based on business impact and failure frequency	2 weeks	P3

KEY FINDINGS

1	API layer experiencing critical stability issues with only 22 of 80 tests passing (27.5% success rate)
2	UI automation showing better but still suboptimal performance at 57 of 83 tests passing (68.7% success rate)
3	Overall system reliability at 48% indicates widespread functional degradation across the application
4	Strong correlation between backend instability and frontend failures suggests dependency-related issues
5	42% gap from target pass rate indicates multiple critical defects requiring resolution
