RELEASE VERDICT

NEEDS ATTENTION

Current: 86% | Target: 90% | Gap: +4%

The Revenue Management System • Kenya automated UI testing suite completed 74 tests with an 86% pass rate (64 passed, 10 failed), falling 4 percentage points short of the 90% target threshold. The test execution revealed specific areas within the application that require attention to improve system stability and user interface reliability. The failed tests indicate potential issues in the application's UI components, data handling, or integration points that need investigation and resolution. Given the proximity to the target pass rate, focused remediation of the identified failures should enable the system to meet quality standards. The test coverage appears comprehensive, and addressing the current failures will strengthen the overall system robustness for production deployment.

RECOMMENDED ACTIONS

#	Recommended Action	Due	Priority
1	Analyze the 10 failed test cases to identify common failure patterns or affected application modules	Immediate	P1
2	Prioritize fixes for failed scenarios based on business criticality and user impact	3 days	P1
3	Investigate potential environment-specific issues or data dependencies affecting test outcomes	5 days	P2
4	Implement targeted bug fixes in the application code for identified UI component failures	1 week	P2
5	Re-execute failed tests after fixes to validate remediation effectiveness	1 week	P2
6	Consider implementing additional error handling in the application to improve UI resilience	2 weeks	P3

KEY FINDINGS

1	Current pass rate of 86% indicates system is approaching but not meeting the 90% quality threshold
2	10 test failures suggest specific application modules or features experiencing UI-related issues
3	64 successful tests demonstrate that core system functionality is largely stable
4	4% gap to target suggests focused fixes could quickly achieve compliance
5	Test suite of 74 scenarios provides substantial coverage of the Revenue Management System
