RELEASE VERDICT

REQUIRES REMEDIATION

Current: 73% | Target: 90% | Gap: +17%

The Revenue Management System for Kenya achieved a 73% pass rate with 55 of 75 automated UI tests passing successfully, indicating the core functionality is operational but falls short of the 90% target threshold. The 20 failed tests represent specific areas where the application behavior deviates from expected outcomes, suggesting opportunities for targeted system improvements. The test execution results provide valuable insights into system stability and user interface reliability, with the majority of features performing as designed while highlighting specific modules or workflows requiring development attention to achieve the desired quality benchmarks.

RECOMMENDED ACTIONS

#	Recommended Action	Due	Priority
1	Prioritize investigation of the 20 failed test scenarios to identify root causes in application code	Immediate	P1
2	Categorize failures by severity and business impact for systematic resolution	3 days	P1
3	Implement fixes for high-priority defects affecting critical revenue management workflows	5 days	P2
4	Conduct focused debugging sessions on modules with highest failure concentration	1 week	P2
5	Establish incremental improvement targets to progressively reach 90% pass rate	1 week	P2
6	Schedule regression testing after each fix deployment to validate improvements	2 weeks	P3

KEY FINDINGS

1	Core system functionality demonstrates 73% stability through automated UI validation
2	20 test failures indicate specific application behaviors requiring investigation and remediation
3	17 percentage point gap between current pass rate and 90% target threshold
4	55 successful test executions confirm majority of user workflows are functioning correctly
5	Failed tests cluster around specific functional areas that need targeted fixes
