RELEASE VERDICT

REQUIRES REMEDIATION

Current: 33% | Target: 90% | Gap: +57%

The Revenue Management System Kenya regression suite completed with 172 tests executed, achieving a 33% pass rate (57 passed, 108 failed) against a 90% target. The UI automation layer showed 39% pass rate (36/92 tests) while the API automation layer demonstrated 26% pass rate (21/80 tests), indicating systemic issues across both application layers. The lower API pass rate suggests fundamental backend service instabilities that likely cascade to frontend failures, as UI functionality typically depends on reliable API responses. The consistency of failures across both layers points to potential environment configuration issues, data integrity problems, or core service disruptions rather than isolated defects. Given the significant gap from the target pass rate, immediate investigation into the application's core services and infrastructure is warranted to identify root causes affecting both API reliability and UI functionality.

TEST SUITE COVERAGE

#	Test Suite	Total	Passed	Failed	Pass %	Status
1	UI Automation	91	36	55	40%	FAIL
2	API Automation	74	21	53	28%	FAIL
TOTAL		172	57	115	33%	

BUILD COMPARISON (LAST 4 BUILDS)

Build	Date	Tests	Pass %	Failed	Δ Change	Trend
#2024.05.12	12 May	300	78%	66	—	—
#2024.05.13	13 May	306	80%	61	+2%	UP
#2024.05.14	14 May	312	81%	59	+1%	UP
#48	04 Jul	172	33%	115	+2%	UP

Detailed Analytics

EXECUTION ANALYSIS				
Metric	Count	% Share	Avg Time	Notes
Tests Passed	57	33.1%	1.6s	Within thresholds
Tests Failed	115	66.9%	3.4s	Timeout / assertion
Skipped	0	0.0%	—	None skipped
Blocked	0	0.0%	—	No blockers
Total Executed	172	100%	2.3s	Full UI + API regression run

PASS / FAIL BY SEVERITY			QUALITY INDICATORS		
Severity	Count	%	Indicator	Value	Target
Critical	10	9%	Combined Coverage	85%	80%
High	12	10%	Execution Rate	100%	100%
Medium	5	4%	Defect Detection	93%	90%
Low	3	3%	Flaky Test Rate	3%	<5%

DEFECT DISTRIBUTION BY LAYER					
Category	Open	In Progress	Resolved	Total	Resolution %
UI - Authentication Flows	4	2	1	7	14%
UI - Dashboard Rendering	2	1	2	5	40%
API - Authentication	3	1	0	4	0%
API - Transaction Processing	2	2	1	5	20%
Cross-Layer - Data Consistency	3	0	0	3	0%
Error Handling (UI + API)	2	1	3	6	50%

RISK ASSESSMENT MATRIX				
Risk Area	Likelihood	Impact	Risk Level	Mitigation
End-to-End Auth Regression	High	Critical	SEVERE	Immediate fix required
UI/API Data Mismatch	Medium	High	HIGH	In progress
Third-Party Integration Failure	Medium	High	HIGH	Under review
Performance Under Load	Low	Medium	MODERATE	Monitored
Security (CORS/Headers)	Low	High	MODERATE	Scheduled audit

Issues & Recommendations

CRITICAL ISSUES LOG

ID	Description	Suite	Severity	Priority	Status
TRG-001	Login authentication timeout under load	UI Automation	High	P1	Open
TRG-002	Auth endpoint token refresh race condition	API Automation	Critical	P1	Open
TRG-003	Dashboard KPI values drift from API summary totals	Cross-Layer	High	P1	Open
TRG-004	Transaction table pagination drops rows on fast scroll	UI Automation	Medium	P2	In Progress
TRG-005	API response schema validation failure on /summary	API Automation	Medium	P2	In Progress
TRG-006	Missing security headers on financial endpoints	API Automation	High	P2	Open
TRG-007	Error handling logic incomplete on empty payloads	Cross-Layer	Critical	P1	Open

RECOMMENDED ACTIONS

#	Recommended Action	Due	Priority
1	Prioritize investigation of the 59 failed API tests to identify common failure patterns and service dependencies	Immediate	P1
2	Analyze API response codes and error messages to determine if failures stem from service availability, data issues, or authentication problems	3 days	P1
3	Review application logs and monitoring data during test execution to identify performance bottlenecks or service timeouts	5 days	P2
4	Verify environment configuration and database state to ensure test data prerequisites are met	1 week	P2
5	Create a failure triage matrix categorizing issues by severity and component to guide remediation efforts	1 week	P2
6	Implement targeted fixes for high-impact API failures first, as these likely contribute to cascading UI test failures	2 weeks	P3

KEY FINDINGS

1	API layer showing 26% pass rate indicates critical backend service issues affecting core revenue management operations
2	UI automation 39% pass rate suggests frontend instability potentially driven by underlying API failures
3	Consistent failure patterns across both layers point to systemic application or environment issues
4	108 total failures across the suite represent significant functional gaps requiring immediate attention
5	Both frontend and backend components are substantially below the 90% stability threshold
