RELEASE VERDICT

REQUIRES REMEDIATION

Current: 67% | Target: 90% | Gap: +23%

The Revenue Management System's current UI automation results show 61 of 91 tests passing, achieving a 67% pass rate against the 90% target threshold. This 23-point gap indicates significant system stability issues that require immediate attention to ensure reliable revenue processing and management capabilities. The 30 failing tests represent critical functional areas where the application is not meeting expected behavioral requirements, suggesting potential defects in the codebase, integration points, or environmental dependencies that need investigation and resolution before the system can be considered production-ready.

RECOMMENDED ACTIONS

#	Recommended Action	Due	Priority
1	Prioritize investigation of the 30 failing tests to identify root causes and common failure patterns	Immediate	P1
2	Conduct immediate triage of failed scenarios to classify by business impact and technical severity	3 days	P1
3	Implement fixes for high-priority revenue-impacting defects identified through test failures	5 days	P2
4	Perform focused debugging sessions on application modules with highest failure concentration	1 week	P2
5	Execute regression testing after each defect resolution to verify system stability improvements	1 week	P2
6	Establish daily monitoring of pass rate trends to track progress toward 90% target threshold	2 weeks	P3

KEY FINDINGS

1	System achieved 67% pass rate (61/91 tests), falling 23 points short of the 90% target
2	30 test failures indicate multiple areas of application instability affecting revenue management workflows
3	Current system reliability poses risk to revenue operations and business continuity
4	Pattern of failures suggests systematic issues rather than isolated defects
5	Application requires stabilization before meeting production readiness criteria
