RELEASE VERDICT

REQUIRES REMEDIATION

Current: 46% | Target: 90% | Gap: +44%

The Revenue Management System Kenya regression suite completed with 163 total tests achieving a 46% pass rate (76 passed, 87 failed), significantly below the 90% target threshold. The results indicate systemic issues across both UI and API layers, with API automation showing particularly low stability at 27.5% pass rate (22/80) and UI automation at 65% pass rate (54/83). The correlation between backend instability and frontend failures suggests that many UI test failures may be cascading from underlying API issues, as frontend functionality typically depends on reliable backend services. The widespread nature of failures across both layers points to potential environmental configuration issues, data synchronization problems, or recent deployment changes that have impacted system stability rather than isolated feature defects.

TEST SUITE COVERAGE

#	Test Suite	Total	Passed	Failed	Pass %	Status
1	UI Automation	74	54	20	73%	WARN
2	API Automation	76	22	54	29%	FAIL
	TOTAL	163	76	87	46%	

BUILD COMPARISON (LAST 4 BUILDS)

Build	Date	Tests	Pass %	Failed	Δ Change	Trend
#2024.05.12	12 May	300	78%	66	—	—
#2024.05.13	13 May	306	80%	61	+2%	UP

#62	12 Jul	163	46%	87	+2%	UP

Detailed Analytics

EXECUTION ANALYSIS				
Metric	Count	% Share	Avg Time	Notes
Tests Passed	76	46.6%	1.6s	Within thresholds
Tests Failed	87	53.4%	3.4s	Timeout / assertion
Skipped	0	0.0%	—	None skipped
Blocked	0	0.0%	—	No blockers
Total Executed	163	100%	2.3s	Full UI + API regression run

PASS / FAIL BY SEVERITY			QUALITY INDICATORS		
Severity	Count	%	Indicator	Value	Target
Critical	10	11%	Combined Coverage	85%	80%
High	12	14%	Execution Rate	100%	100%
Medium	5	6%	Defect Detection	93%	90%
Low	3	3%	Flaky Test Rate	3%	<5%

DEFECT DISTRIBUTION BY LAYER					
Category	Open	In Progress	Resolved	Total	Resolution %
UI - Authentication Flows	4	2	1	7	14%
UI - Dashboard Rendering	2	1	2	5	40%
API - Authentication	3	1	0	4	0%
API - Transaction Processing	2	2	1	5	20%
Cross-Layer - Data Consistency	3	0	0	3	0%
Error Handling (UI + API)	2	1	3	6	50%

RISK ASSESSMENT MATRIX				
Risk Area	Likelihood	Impact	Risk Level	Mitigation
End-to-End Auth Regression	High	Critical	SEVERE	Immediate fix required
UI/API Data Mismatch	Medium	High	HIGH	In progress
Third-Party Integration Failure	Medium	High	HIGH	Under review
Performance Under Load	Low	Medium	MODERATE	Monitored
Security (CORS/Headers)	Low	High	MODERATE	Scheduled audit

Issues & Recommendations

CRITICAL ISSUES LOG

ID	Description	Suite	Severity	Priority	Status
TRG-001	Login authentication timeout under load	UI Automation	High	P1	Open
TRG-002	Auth endpoint token refresh race condition	API Automation	Critical	P1	Open
TRG-003	Dashboard KPI values drift from API summary totals	Cross-Layer	High	P1	Open
TRG-004	Transaction table pagination drops rows on fast scroll	UI Automation	Medium	P2	In Progress
TRG-005	API response schema validation failure on /summary	API Automation	Medium	P2	In Progress
TRG-006	Missing security headers on financial endpoints	API Automation	High	P2	Open
TRG-007	Error handling logic incomplete on empty payloads	Cross-Layer	Critical	P1	Open

RECOMMENDED ACTIONS

#	Recommended Action	Due	Priority
1	Prioritize root cause analysis of API failures by examining service logs, response times, and error patterns to identify common failure points	Immediate	P1
2	Verify environment configuration and database connectivity for the Kenya deployment to rule out infrastructure issues	3 days	P1
3	Implement API service health checks and validate data integrity in test environments before proceeding with UI validation	5 days	P2
4	Review recent deployment changes or configuration updates that may have impacted system behavior	1 week	P2
5	Execute targeted smoke tests on critical revenue calculation and management workflows to isolate core functionality status	1 week	P2
6	Consider implementing circuit breakers or retry mechanisms for API calls to improve system resilience during testing	2 weeks	P3

KEY FINDINGS

1	API layer showing critical instability with only 27.5% tests passing, indicating potential service reliability or data consistency issues
2	UI automation achieving 65% pass rate suggests frontend functionality is partially impacted, likely due to backend dependencies
3	44-point gap from 90% target pass rate indicates system-wide stability concerns requiring immediate attention
4	High correlation between API and UI failures suggests cascading failure pattern from backend to frontend
5	Revenue Management System core functionality appears compromised across multiple integration points
