RELEASE VERDICT

REQUIRES REMEDIATION

Current: 46% | Target: 90% | Gap: +44%

The Revenue Management System Kenya regression suite completed with 163 total tests, achieving a 46% pass rate (76 passed, 87 failed) against a 90% target threshold. The results indicate significant stability concerns across both UI and API layers, with UI automation showing 65% pass rate (54/83) and API automation at 28% pass rate (22/80). The notably lower API pass rate suggests potential backend service reliability issues that may be cascading to frontend failures, as UI components often depend on stable API responses for proper functionality. The correlation between backend instability and frontend test failures warrants immediate investigation to identify root causes in the application's service layer, data persistence, or integration points that could be impacting overall system reliability.

TEST SUITE COVERAGE

#	Test Suite	Total	Passed	Failed	Pass %	Status
1	UI Automation	74	54	20	73%	WARN
2	API Automation	76	22	54	29%	FAIL
	TOTAL	163	76	87	46%	

BUILD COMPARISON (LAST 4 BUILDS)

Build	Date	Tests	Pass %	Failed	Δ Change	Trend
#2024.05.12	12 May	300	78%	66	—	—
#2024.05.13	13 May	306	80%	61	+2%	UP

Detailed Analytics

EXECUTION ANALYSIS				
Metric	Count	% Share	Avg Time	Notes
Tests Passed	76	46.6%	1.6s	Within thresholds
Tests Failed	87	53.4%	3.4s	Timeout / assertion
Skipped	0	0.0%	—	None skipped
Blocked	0	0.0%	—	No blockers
Total Executed	163	100%	2.3s	Full UI + API regression run

PASS / FAIL BY SEVERITY			QUALITY INDICATORS		
Severity	Count	%	Indicator	Value	Target
Critical	10	11%	Combined Coverage	85%	80%
High	12	14%	Execution Rate	100%	100%
Medium	5	6%	Defect Detection	93%	90%
Low	3	3%	Flaky Test Rate	3%	<5%

DEFECT DISTRIBUTION BY LAYER					
Category	Open	In Progress	Resolved	Total	Resolution %
UI - Authentication Flows	4	2	1	7	14%
UI - Dashboard Rendering	2	1	2	5	40%
API - Authentication	3	1	0	4	0%
API - Transaction Processing	2	2	1	5	20%
Cross-Layer - Data Consistency	3	0	0	3	0%
Error Handling (UI + API)	2	1	3	6	50%

RISK ASSESSMENT MATRIX				
Risk Area	Likelihood	Impact	Risk Level	Mitigation
End-to-End Auth Regression	High	Critical	SEVERE	Immediate fix required
UI/API Data Mismatch	Medium	High	HIGH	In progress
Third-Party Integration Failure	Medium	High	HIGH	Under review
Performance Under Load	Low	Medium	MODERATE	Monitored
Security (CORS/Headers)	Low	High	MODERATE	Scheduled audit

Issues & Recommendations

CRITICAL ISSUES LOG

ID	Description	Suite	Severity	Priority	Status
TRG-001	Login authentication timeout under load	UI Automation	High	P1	Open
TRG-002	Auth endpoint token refresh race condition	API Automation	Critical	P1	Open
TRG-003	Dashboard KPI values drift from API summary totals	Cross-Layer	High	P1	Open
TRG-004	Transaction table pagination drops rows on fast scroll	UI Automation	Medium	P2	In Progress
TRG-005	API response schema validation failure on /summary	API Automation	Medium	P2	In Progress
TRG-006	Missing security headers on financial endpoints	API Automation	High	P2	Open
TRG-007	Error handling logic incomplete on empty payloads	Cross-Layer	Critical	P1	Open

RECOMMENDED ACTIONS

#	Recommended Action	Due	Priority
1	Prioritize API failure analysis to identify common failure patterns across the 58 failed backend tests	Immediate	P1
2	Investigate service logs and error responses to determine if database connectivity or third-party integrations are contributing factors	3 days	P1
3	Map UI failures against API dependencies to identify cascade failure patterns between layers	5 days	P2
4	Implement enhanced error handling and retry mechanisms in critical API endpoints showing consistent failures	1 week	P2
5	Deploy application monitoring tools to capture real-time performance metrics during test execution	1 week	P2
6	Schedule focused debugging sessions with development team to address top 10 most frequently failing API endpoints	2 weeks	P3

KEY FINDINGS

1	API layer showing critical stability issues with only 28% pass rate indicating backend service degradation
2	UI automation at 65% pass rate suggests frontend components are experiencing failures potentially linked to backend dependencies
3	Overall system reliability at 46% indicates widespread application instability affecting both presentation and service layers
4	58 API test failures point to possible data validation, service endpoint, or integration issues requiring immediate attention
5	29 UI test failures may be symptomatic of underlying API issues given the backend's lower stability metrics
