RELEASE VERDICT

NEEDS ATTENTION

Current: 86% | Target: 90% | Gap: +4%

The Revenue Management System Kenya UI automation suite executed 74 tests with 64 passing and 10 failing, achieving an 86% pass rate against the 90% target threshold. The test execution reveals specific areas within the application that require attention to improve system stability and user experience. The 10 failed tests indicate potential defects or regression issues in the application functionality that need investigation and resolution. The current pass rate suggests the system is approaching but has not yet reached the desired quality benchmark, with identifiable opportunities for improvement in application behavior and reliability.

RECOMMENDED ACTIONS

#	Recommended Action	Due	Priority
1	Analyze the 10 failed test cases to identify root causes and patterns in application failures	Immediate	P1
2	Prioritize bug fixes for the failing scenarios based on business impact and user criticality	3 days	P1
3	Implement targeted fixes for identified defects and validate through re-execution of failed tests	5 days	P2
4	Review application logs and error messages from failed tests to expedite debugging process	1 week	P2
5	Schedule focused development effort on the modules with highest failure concentration	1 week	P2
6	Execute regression testing after fixes to ensure no new issues are introduced and verify pass rate improvement	2 weeks	P3

KEY FINDINGS

1	System achieved 86% pass rate with 64 of 74 automated UI tests passing successfully
2	10 test failures indicate potential defects in specific application workflows or UI components
3	4% gap from the 90% target pass rate suggests focused remediation needed in failing areas
4	Majority of application functionality (86%) is performing as expected per test specifications
5	Failed tests provide clear indicators for areas requiring immediate development attention
