RELEASE VERDICT

REQUIRES REMEDIATION

Current: 0% | Target: 90% | Gap: **+90%**

The Revenue Management System for Kenya shows critical stability issues with a 0% pass rate in the automated UI test suite, falling significantly below the 90% target threshold. The single test failure indicates a fundamental blocking issue preventing successful execution, suggesting either a critical defect in the application's UI layer, environmental configuration problems, or incompatibility between the application build and expected behavior. This complete failure pattern typically points to systemic issues rather than isolated defects, requiring immediate investigation into the application's core functionality and deployment state to restore system reliability and enable revenue operations.

RECOMMENDED ACTIONS

#	Recommended Action	Due	Priority
1	Immediately investigate application logs to identify root cause of UI layer failure	Immediate	P1
2	Verify deployment completeness and configuration settings for Kenya instance	3 days	P1
3	Check database connectivity and data integrity for revenue management modules	5 days	P2
4	Validate API endpoints and service dependencies are operational and accessible	1 week	P2
5	Review recent code changes or deployments that may have impacted system stability	1 week	P2
6	Execute manual smoke tests to determine if issue is UI-specific or system-wide	2 weeks	P3

KEY FINDINGS

1	Complete test failure with 0% pass rate versus 90% target indicates critical system instability
2	Single test execution suggests early-stage failure preventing broader test coverage
3	Application appears to have fundamental blocking issues in UI layer functionality
4	Revenue Management System for Kenya is currently in a non-operational state for automated validation
5	Test execution environment successfully initiated but application failed to respond as expected
