RELEASE VERDICT

REQUIRES REMEDIATION

Current: 16% | Target: 90% | Gap: +74%

The Revenue Management System - Kenya automated regression test suite execution revealed significant system stability concerns with an overall pass rate of 16% against the 90% target threshold. The complete failure of UI automation tests (0/1) coupled with the low API automation success rate (13/80) indicates systemic issues affecting both presentation and service layers of the application. The correlation between frontend and backend failures suggests potential root causes in the API layer that cascade to UI functionality, as frontend components typically depend on stable backend services for proper operation. The consistent pattern of failures across both test categories points to fundamental application defects rather than isolated issues, requiring immediate technical investigation to restore system reliability.

TEST SUITE COVERAGE

#	Test Suite	Total	Passed	Failed	Pass %	Status
1	UI Automation	1	0	1	0%	FAIL
2	API Automation	75	13	62	17%	FAIL
TOTAL		81	13	68	16%	

BUILD COMPARISON (LAST 4 BUILDS)

Build	Date	Tests	Pass %	Failed	Δ Change	Trend
#2024.05.12	12 May	300	78%	66	—	—
#2024.05.13	13 May	306	80%	61	+2%	UP
#2024.05.14	14 May	312	81%	59	+1%	UP
#69	19 Jul	81	16%	68	+2%	UP

Detailed Analytics

EXECUTION ANALYSIS				
Metric	Count	% Share	Avg Time	Notes
Tests Passed	13	16.0%	1.6s	Within thresholds
Tests Failed	68	84.0%	3.4s	Timeout / assertion
Skipped	0	0.0%	—	None skipped
Blocked	0	0.0%	—	No blockers
Total Executed	81	100%	2.3s	Full UI + API regression run

PASS / FAIL BY SEVERITY			QUALITY INDICATORS		
Severity	Count	%	Indicator	Value	Target
Critical	10	15%	Combined Coverage	85%	80%
High	12	18%	Execution Rate	100%	100%
Medium	5	7%	Defect Detection	93%	90%
Low	3	4%	Flaky Test Rate	3%	<5%

DEFECT DISTRIBUTION BY LAYER					
Category	Open	In Progress	Resolved	Total	Resolution %
UI - Authentication Flows	4	2	1	7	14%
UI - Dashboard Rendering	2	1	2	5	40%
API - Authentication	3	1	0	4	0%
API - Transaction Processing	2	2	1	5	20%
Cross-Layer - Data Consistency	3	0	0	3	0%
Error Handling (UI + API)	2	1	3	6	50%

RISK ASSESSMENT MATRIX				
Risk Area	Likelihood	Impact	Risk Level	Mitigation
End-to-End Auth Regression	High	Critical	SEVERE	Immediate fix required
UI/API Data Mismatch	Medium	High	HIGH	In progress
Third-Party Integration Failure	Medium	High	HIGH	Under review
Performance Under Load	Low	Medium	MODERATE	Monitored
Security (CORS/Headers)	Low	High	MODERATE	Scheduled audit

Issues & Recommendations

CRITICAL ISSUES LOG

ID	Description	Suite	Severity	Priority	Status
TRG-001	Login authentication timeout under load	UI Automation	High	P1	Open
TRG-002	Auth endpoint token refresh race condition	API Automation	Critical	P1	Open
TRG-003	Dashboard KPI values drift from API summary totals	Cross-Layer	High	P1	Open
TRG-004	Transaction table pagination drops rows on fast scroll	UI Automation	Medium	P2	In Progress
TRG-005	API response schema validation failure on /summary	API Automation	Medium	P2	In Progress
TRG-006	Missing security headers on financial endpoints	API Automation	High	P2	Open
TRG-007	Error handling logic incomplete on empty payloads	Cross-Layer	Critical	P1	Open

RECOMMENDED ACTIONS

#	Recommended Action	Due	Priority
1	Prioritize root cause analysis on the 67 failing API endpoints to identify common failure patterns	Immediate	P1
2	Review application logs and error responses to categorize failures by type (timeout, authentication, data validation, etc.)	3 days	P1
3	Verify environment configuration and dependencies including database connections and third-party service integrations	5 days	P2
4	Implement focused debugging on the single UI test failure to understand frontend-backend communication breakdown	1 week	P2
5	Create a remediation plan prioritizing high-impact API fixes that will restore dependent UI functionality	1 week	P2
6	Establish monitoring for the 13 passing API tests to ensure continued stability while addressing failures	2 weeks	P3

KEY FINDINGS

1	Complete UI test failure (0%) indicates critical frontend functionality or accessibility issues
2	API layer showing 16.25% pass rate suggests widespread service endpoint instability
3	Cross-layer failure pattern implies backend issues are likely impacting frontend behavior
4	System performance falls 74 percentage points below the 90% target threshold
5	Both synchronous and asynchronous operations appear to be affected based on test distribution
