RELEASE VERDICT

REQUIRES REMEDIATION

Current: 0% | Target: 90% | Gap: **+90%**

The Revenue Management System Kenya backend API infrastructure is experiencing critical stability issues with a 0.87% overall pass rate across 115 automated tests, significantly below the 90% target threshold. The systematic failure pattern affecting both API Automation suite (1/76 passed) and Backend Smoke Validation suite (0/39 passed) indicates fundamental service-level issues rather than isolated endpoint problems. The near-total failure rate suggests potential environmental configuration issues, service availability problems, authentication/authorization failures, or breaking changes in the API contract that require immediate investigation to restore system functionality.

TBE-002	Null reference on empty payload	API Automation	Medium	P3	Triaged

RECOMMENDED ACTIONS

#	Recommended Action	Due	Priority
1	Immediately verify backend service health status and availability of all Revenue Management System endpoints	Immediate	P1
2	Review API gateway logs and service monitoring dashboards for connection timeouts, 5xx errors, or service outages	3 days	P1
3	Validate authentication/authorization mechanisms and API key configurations across all environments	5 days	P2
4	Check for recent deployments or infrastructure changes that may have altered API contracts or endpoint configurations	1 week	P2
5	Analyze the single passing test to identify what differentiates it from failing endpoints	1 week	P2
6	Establish emergency response protocol to restore core API functionality before next business cycle	2 weeks	P3

KEY FINDINGS

1	Critical backend service failure with only 1 of 115 total API tests passing (0.87% pass rate)
2	Complete failure of smoke validation suite (0/39) indicates core endpoint functionality is compromised
3	API automation suite shows 98.7% failure rate (75/76 failed) suggesting widespread service disruption
4	System is operating at 89.13% below the 90% target pass rate threshold
5	Failure pattern spans both validation suites indicating systemic rather than isolated issues
