RELEASE VERDICT

REQUIRES REMEDIATION

Current: 0% | Target: 90% | Gap: **+90%**

The Revenue Management System UI automation execution resulted in a 0% pass rate with the single test case failing, indicating a critical issue preventing successful validation of the system's user interface functionality. This complete test failure suggests either a fundamental blocking issue in the application's UI layer, environmental configuration problems, or significant changes in the application that require immediate investigation. The 90 percentage point gap from the target pass rate necessitates urgent technical intervention to identify and resolve the root cause, as the current state prevents any automated validation of the Revenue Management System's UI capabilities.

RECOMMENDED ACTIONS

#	Recommended Action	Due	Priority
1	Perform immediate root cause analysis on the failed test to identify blocking issue	Immediate	P1
2	Verify Revenue Management System UI accessibility and basic functionality manually	3 days	P1
3	Check environment configuration and connectivity to ensure proper test execution setup	5 days	P2
4	Review application logs and error messages for system exceptions or crashes	1 week	P2
5	Validate recent deployments or changes that may have impacted UI functionality	1 week	P2
6	Execute smoke test manually to confirm basic system availability before re-running automation	2 weeks	P3

KEY FINDINGS

1	Single UI automation test failed resulting in 0% pass rate versus 90% target
2	Complete test failure indicates potential system-wide blocking issue
3	Revenue Management System UI functionality cannot be validated in current state
4	90 percentage point gap from target suggests critical application or environment issue
5	Test execution blocked at initial stage preventing further validation coverage
