RELEASE VERDICT

REQUIRES REMEDIATION

Current: 52% | Target: 90% | Gap: +38%

The Revenue Management System Kenya automated regression suite completed with a 52% pass rate (86 of 163 tests passing), significantly below the 90% target threshold. The results reveal systemic reliability concerns across both application layers, with API automation showing particularly low stability at 27.5% pass rate (22 of 80 tests) compared to UI automation at 77.1% pass rate (64 of 83 tests). The substantially higher failure rate in the API layer suggests underlying backend service instabilities that likely cascade into frontend functionality issues, as UI components depend on reliable API responses for proper operation. The disparity between UI and API success rates indicates that while the user interface components maintain reasonable stability when isolated, the backend services and data flow mechanisms require immediate attention to restore system reliability.

TEST SUITE COVERAGE

#	Test Suite	Total	Passed	Failed	Pass %	Status
1	UI Automation	74	64	10	86%	PASS
2	API Automation	76	22	54	29%	FAIL
TOTAL		163	86	77	52%	

BUILD COMPARISON (LAST 4 BUILDS)

Build	Date	Tests	Pass %	Failed	Δ Change	Trend

Detailed Analytics

EXECUTION ANALYSIS				
Metric	Count	% Share	Avg Time	Notes
Tests Passed	86	52.8%	1.6s	Within thresholds
Tests Failed	77	47.2%	3.4s	Timeout / assertion
Skipped	0	0.0%	—	None skipped
Blocked	0	0.0%	—	No blockers
Total Executed	163	100%	2.3s	Full UI + API regression run

PASS / FAIL BY SEVERITY			QUALITY INDICATORS		
Severity	Count	%	Indicator	Value	Target
Critical	10	13%	Combined Coverage	85%	80%
High	12	16%	Execution Rate	100%	100%
Medium	5	6%	Defect Detection	93%	90%
Low	3	4%	Flaky Test Rate	3%	<5%

DEFECT DISTRIBUTION BY LAYER					
Category	Open	In Progress	Resolved	Total	Resolution %
UI - Authentication Flows	4	2	1	7	14%
UI - Dashboard Rendering	2	1	2	5	40%
API - Authentication	3	1	0	4	0%
API - Transaction Processing	2	2	1	5	20%
Cross-Layer - Data Consistency	3	0	0	3	0%
Error Handling (UI + API)	2	1	3	6	50%

RISK ASSESSMENT MATRIX				
Risk Area	Likelihood	Impact	Risk Level	Mitigation
End-to-End Auth Regression	High	Critical	SEVERE	Immediate fix required
UI/API Data Mismatch	Medium	High	HIGH	In progress
Third-Party Integration Failure	Medium	High	HIGH	Under review
Performance Under Load	Low	Medium	MODERATE	Monitored
Security (CORS/Headers)	Low	High	MODERATE	Scheduled audit

Issues & Recommendations

CRITICAL ISSUES LOG

ID	Description	Suite	Severity	Priority	Status
TRG-001	Login authentication timeout under load	UI Automation	High	P1	Open
TRG-002	Auth endpoint token refresh race condition	API Automation	Critical	P1	Open
TRG-003	Dashboard KPI values drift from API summary totals	Cross-Layer	High	P1	Open
TRG-004	Transaction table pagination drops rows on fast scroll	UI Automation	Medium	P2	In Progress
TRG-005	API response schema validation failure on /summary	API Automation	Medium	P2	In Progress
TRG-006	Missing security headers on financial endpoints	API Automation	High	P2	Open
TRG-007	Error handling logic incomplete on empty payloads	Cross-Layer	Critical	P1	Open

RECOMMENDED ACTIONS

#	Recommended Action	Due	Priority
1	Prioritize investigation of the 58 failing API tests to identify common failure patterns and root causes in backend services	Immediate	P1
2	Conduct detailed analysis of API response times, timeout configurations, and service availability issues	3 days	P1
3	Review database connection stability and query performance for revenue calculation and reporting modules	5 days	P2
4	Implement enhanced error handling and retry mechanisms in API endpoints to improve resilience	1 week	P2
5	Verify data consistency between UI and API layers, focusing on revenue data synchronization	1 week	P2
6	Execute targeted debugging sessions on high-impact API failures before proceeding with full regression cycles	2 weeks	P3

KEY FINDINGS

1	API layer demonstrates critical instability with 72.5% failure rate, indicating backend service reliability issues
2	UI automation maintains 77.1% pass rate, suggesting frontend components are relatively stable when not impacted by backend failures
3	Overall system reliability at 52% indicates production readiness concerns requiring immediate remediation
4	Significant gap between UI and API performance suggests integration and data flow issues between layers
5	Current pass rate is 38 percentage points below the 90% target, requiring comprehensive system stabilization
