RELEASE VERDICT

REQUIRES REMEDIATION

Current: 33% | Target: 90% | Gap: +57%

The Revenue Management System Kenya regression suite execution completed with 172 tests showing a 33% pass rate (58 passed, 108 failed), significantly below the 90% target threshold. The results indicate systemic issues across both application layers, with UI automation achieving 40% pass rate (37/92) and API automation at 26% pass rate (21/80). The lower API pass rate suggests fundamental backend service instabilities that likely cascade to frontend failures, as UI functionality typically depends on stable API responses. The widespread failure pattern across both layers points to potential environment configuration issues, data consistency problems, or recent deployment changes that have impacted core system functionality rather than isolated feature defects.

TEST SUITE COVERAGE

#	Test Suite	Total	Passed	Failed	Pass %	Status
1	UI Automation	92	37	55	40%	FAIL
2	API Automation	74	21	53	28%	FAIL
TOTAL		172	58	114	33%	

BUILD COMPARISON (LAST 4 BUILDS)

Build	Date	Tests	Pass %	Failed	Δ Change	Trend
#2024.05.12	12 May	300	78%	66	—	—
#2024.05.13	13 May	306	80%	61	+2%	UP
#2024.05.14	14 May	312	81%	59	+1%	UP

Detailed Analytics

EXECUTION ANALYSIS				
Metric	Count	% Share	Avg Time	Notes
Tests Passed	58	33.7%	1.6s	Within thresholds
Tests Failed	114	66.3%	3.4s	Timeout / assertion
Skipped	0	0.0%	—	None skipped
Blocked	0	0.0%	—	No blockers
Total Executed	172	100%	2.3s	Full UI + API regression run

PASS / FAIL BY SEVERITY			QUALITY INDICATORS		
Severity	Count	%	Indicator	Value	Target
Critical	10	9%	Combined Coverage	85%	80%
High	12	11%	Execution Rate	100%	100%
Medium	5	4%	Defect Detection	93%	90%
Low	3	3%	Flaky Test Rate	3%	<5%

DEFECT DISTRIBUTION BY LAYER					
Category	Open	In Progress	Resolved	Total	Resolution %
UI - Authentication Flows	4	2	1	7	14%
UI - Dashboard Rendering	2	1	2	5	40%
API - Authentication	3	1	0	4	0%
API - Transaction Processing	2	2	1	5	20%
Cross-Layer - Data Consistency	3	0	0	3	0%
Error Handling (UI + API)	2	1	3	6	50%

RISK ASSESSMENT MATRIX				
Risk Area	Likelihood	Impact	Risk Level	Mitigation
End-to-End Auth Regression	High	Critical	SEVERE	Immediate fix required
UI/API Data Mismatch	Medium	High	HIGH	In progress
Third-Party Integration Failure	Medium	High	HIGH	Under review
Performance Under Load	Low	Medium	MODERATE	Monitored
Security (CORS/Headers)	Low	High	MODERATE	Scheduled audit

Issues & Recommendations

CRITICAL ISSUES LOG

ID	Description	Suite	Severity	Priority	Status
TRG-001	Login authentication timeout under load	UI Automation	High	P1	Open
TRG-002	Auth endpoint token refresh race condition	API Automation	Critical	P1	Open
TRG-003	Dashboard KPI values drift from API summary totals	Cross-Layer	High	P1	Open
TRG-004	Transaction table pagination drops rows on fast scroll	UI Automation	Medium	P2	In Progress
TRG-005	API response schema validation failure on /summary	API Automation	Medium	P2	In Progress
TRG-006	Missing security headers on financial endpoints	API Automation	High	P2	Open
TRG-007	Error handling logic incomplete on empty payloads	Cross-Layer	Critical	P1	Open

RECOMMENDED ACTIONS

#	Recommended Action	Due	Priority
1	Prioritize investigation of top failing API endpoints to identify common failure patterns or service disruptions	Immediate	P1
2	Verify environment configuration settings and database connectivity for the Kenya deployment	3 days	P1
3	Review recent deployment logs and rollback if critical breaking changes are identified	5 days	P2
4	Implement API health checks and monitoring to catch service degradation before full regression runs	1 week	P2
5	Establish smoke test subset focusing on core revenue workflows to quickly validate system stability	1 week	P2
6	Create dependency mapping between failed UI tests and their corresponding API calls for targeted fixes	2 weeks	P3

KEY FINDINGS

1	Backend API layer showing 74% failure rate indicates critical service reliability issues affecting data operations
2	UI automation 60% failure rate suggests frontend functionality is compromised, potentially due to upstream API dependencies
3	System-wide regression failure pattern indicates possible environment or deployment configuration issues
4	Both layers falling significantly short of 90% target suggests need for immediate system stabilization
5	High correlation between API and UI failures points to cascading effects from backend instabilities
