RELEASE VERDICT

NEEDS ATTENTION

Current: 86% | Target: 90% | Gap: +4%

The Revenue Management System • Kenya automated UI test suite executed 74 tests with 64 passing and 10 failing, achieving an 86% pass rate against the 90% target threshold. The results indicate that while the majority of the system's user interface components are functioning as expected, there are specific areas within the application that require attention to improve stability and reliability. The 10 failing tests represent potential issues in the application's UI behavior that need investigation and resolution to ensure optimal system performance and user experience. These failures provide valuable insight into areas where the application may not be meeting expected functional requirements or where recent changes may have introduced regressions.

RECOMMENDED ACTIONS

#	Recommended Action	Due	Priority
1	Prioritize investigation of the 10 failing test scenarios to identify root causes in the application	Immediate	P1
2	Review application logs and error messages corresponding to the failed test execution timeframes	3 days	P1
3	Validate if recent deployments or configuration changes correlate with the identified failures	5 days	P2
4	Implement fixes for the identified UI issues and verify resolution through re-execution	1 week	P2
5	Consider implementing additional application monitoring to catch UI degradation earlier	1 week	P2
6	Schedule focused debugging sessions for the specific application modules showing failures	2 weeks	P3

KEY FINDINGS

1	Current pass rate of 86% is 4 percentage points below the 90% target threshold
2	64 tests are passing consistently, demonstrating stable functionality across most UI components
3	10 test failures indicate specific application behaviors requiring remediation
4	The system shows 86% UI functionality compliance with expected behavior patterns
5	Test coverage spans 74 distinct UI scenarios providing comprehensive validation of the revenue management interface
