RELEASE VERDICT

REQUIRES REMEDIATION

Current: 1% | Target: 90% | Gap: +89%

The Revenue Management System Kenya regression suite completed with a 1% pass rate (1/77 tests passing), significantly below the 90% target threshold, indicating widespread system instability across both UI and API layers. The complete failure of UI automation tests (0/1) combined with near-total API test failures (1/76) suggests fundamental system-wide issues rather than isolated defects, with potential root causes including environmental configuration problems, service connectivity issues, authentication/authorization failures, or critical breaking changes in recent deployments. The correlation between frontend and backend failures points to underlying infrastructure or core service disruptions that are preventing both layers from functioning correctly, requiring immediate technical investigation to restore system stability before normal testing activities can resume effectively.

TEST SUITE COVERAGE

#	Test Suite	Total	Passed	Failed	Pass %	Status
1	UI Automation	1	0	1	0%	FAIL
2	API Automation	76	1	75	1%	FAIL
	TOTAL	77	1	76	1%	

BUILD COMPARISON (LAST 4 BUILDS)

Build	Date	Tests	Pass %	Failed	Δ Change	Trend
#2024.05.12	12 May	300	78%	66	—	—
#2024.05.13	13 May	306	80%	61	+2%	UP
#2024.05.14	14 May	312	81%	59	+1%	UP
#75	25 Jul	77	1%	76	+2%	UP

Detailed Analytics

EXECUTION ANALYSIS

Metric	Count	% Share	Avg Time	Notes
Tests Passed	1	1.3%	1.6s	Within thresholds
Tests Failed	76	98.7%	3.4s	Timeout / assertion
Skipped	0	0.0%	—	None skipped
Blocked	0	0.0%	—	No blockers
Total Executed	77	100%	2.3s	Full UI + API regression run

PASS / FAIL BY SEVERITY			QUALITY INDICATORS		
Severity	Count	%	Indicator	Value	Target
Critical	10	13%	Combined Coverage	85%	80%
High	12	16%	Execution Rate	100%	100%
Medium	5	7%	Defect Detection	93%	90%
Low	3	4%	Flaky Test Rate	3%	<5%

DEFECT DISTRIBUTION BY LAYER

Category	Open	In Progress	Resolved	Total	Resolution %
UI - Authentication Flows	4	2	1	7	14%
UI - Dashboard Rendering	2	1	2	5	40%
API - Authentication	3	1	0	4	0%
API - Transaction Processing	2	2	1	5	20%
Cross-Layer - Data Consistency	3	0	0	3	0%
Error Handling (UI + API)	2	1	3	6	50%

RISK ASSESSMENT MATRIX

Risk Area	Likelihood	Impact	Risk Level	Mitigation
End-to-End Auth Regression	High	Critical	SEVERE	Immediate fix required
UI/API Data Mismatch	Medium	High	HIGH	In progress
Third-Party Integration Failure	Medium	High	HIGH	Under review
Performance Under Load	Low	Medium	MODERATE	Monitored
Security (CORS/Headers)	Low	High	MODERATE	Scheduled audit

Issues & Recommendations

CRITICAL ISSUES LOG

ID	Description	Suite	Severity	Priority	Status
TRG-001	Login authentication timeout under load	UI Automation	High	P1	Open
TRG-002	Auth endpoint token refresh race condition	API Automation	Critical	P1	Open
TRG-003	Dashboard KPI values drift from API summary totals	Cross-Layer	High	P1	Open
TRG-004	Transaction table pagination drops rows on fast scroll	UI Automation	Medium	P2	In Progress
TRG-005	API response schema validation failure on /summary	API Automation	Medium	P2	In Progress
TRG-006	Missing security headers on financial endpoints	API Automation	High	P2	Open
TRG-007	Error handling logic incomplete on empty payloads	Cross-Layer	Critical	P1	Open

RECOMMENDED ACTIONS

#	Recommended Action	Due	Priority
1	Verify environment health checks including database connectivity, service availability, and infrastructure components	Immediate	P1
2	Review recent deployment logs and rollback if breaking changes were introduced to production or test environments	3 days	P1
3	Validate authentication services and API gateway configurations to ensure proper request routing and authorization	5 days	P2
4	Analyze the single passing API test to identify working components and use as baseline for troubleshooting	1 week	P2
5	Conduct manual smoke testing of critical user journeys to confirm system accessibility and basic functionality	1 week	P2
6	Implement service monitoring and alerting for real-time detection of system outages or degradation	2 weeks	P3

KEY FINDINGS

1	Complete UI layer failure (0/1) indicates frontend components cannot execute successfully against current system state
2	API layer showing 98.7% failure rate (75/76 failed) suggests core backend services or endpoints are non-responsive or returning errors
3	Single passing API test demonstrates partial system connectivity but widespread service degradation
4	Simultaneous frontend and backend failures indicate systemic issues rather than layer-specific defects
5	Current 1% pass rate versus 90% target represents critical system stability gap requiring immediate intervention
