RELEASE VERDICT

REQUIRES REMEDIATION

Current: 72% | Target: 90% | Gap: +18%

The Revenue Management System Kenya automated UI test suite completed with 54 of 74 tests passing, achieving a 72% pass rate against the 90% target threshold. The 20 failing tests indicate specific areas within the application that require attention to improve system stability and reliability. The test execution results suggest that while core functionality appears operational for the majority of scenarios, there are consistent behavioral issues in certain application modules that need to be addressed. These results provide valuable insight into the current state of the system and highlight specific areas where development focus should be directed to achieve the required stability benchmarks.

RECOMMENDED ACTIONS

#	Recommended Action	Due	Priority
1	Analyze the 20 failing tests to identify common failure patterns and affected application modules	Immediate	P1
2	Prioritize fixing application defects in modules with the highest concentration of test failures	3 days	P1
3	Implement targeted code fixes for the specific UI components causing test failures	5 days	P2
4	Conduct focused debugging sessions on application areas with consistent test failures	1 week	P2
5	Establish incremental improvement targets to progressively increase pass rate from 72% to 90%	1 week	P2
6	Schedule regression testing after each fix deployment to validate improvement in pass rates	2 weeks	P3

KEY FINDINGS

1	Current pass rate of 72% falls 18 percentage points below the 90% target threshold
2	54 tests are executing successfully, demonstrating stable core functionality in multiple areas
3	20 test failures indicate specific application behaviors that deviate from expected outcomes
4	27% failure rate suggests systematic issues in certain application modules requiring investigation
5	Test coverage of 74 scenarios provides comprehensive visibility into system behavior patterns
