RELEASE VERDICT

REQUIRES REMEDIATION

Current: 55% | Target: 90% | Gap: +35%

The Revenue Management System Kenya regression suite completed with 163 tests achieving a 55% pass rate (90 passed, 61 failed), significantly below the 90% target threshold. The results reveal a notable disparity between UI and API layer stability, with frontend UI tests performing substantially better at 82% pass rate (68/83) compared to backend API tests at only 27.5% pass rate (22/80). This pattern suggests systemic backend service reliability issues that are likely impacting overall system functionality. The API layer instability appears to be the primary contributor to the low overall pass rate, indicating potential issues with service endpoints, data persistence, authentication mechanisms, or integration points. The relatively higher UI pass rate suggests that frontend components are functioning when backend services respond correctly, but the severe API failure rate indicates fundamental backend stability concerns requiring immediate attention.

TEST SUITE COVERAGE

#	Test Suite	Total	Passed	Failed	Pass %	Status
1	UI Automation	75	68	7	91%	PASS
2	API Automation	76	22	54	29%	FAIL
TOTAL		163	90	73	55%

Detailed Analytics

EXECUTION ANALYSIS				
Metric	Count	% Share	Avg Time	Notes
Tests Passed	90	55.2%	1.6s	Within thresholds
Tests Failed	73	44.8%	3.4s	Timeout / assertion
Skipped	0	0.0%	—	None skipped
Blocked	0	0.0%	—	No blockers
Total Executed	163	100%	2.3s	Full UI + API regression run

PASS / FAIL BY SEVERITY			QUALITY INDICATORS		
Severity	Count	%	Indicator	Value	Target
Critical	10	14%	Combined Coverage	85%	80%
High	12	16%	Execution Rate	100%	100%
Medium	5	7%	Defect Detection	93%	90%
Low	3	4%	Flaky Test Rate	3%	<5%

DEFECT DISTRIBUTION BY LAYER					
Category	Open	In Progress	Resolved	Total	Resolution %
UI - Authentication Flows	4	2	1	7	14%
UI - Dashboard Rendering	2	1	2	5	40%
API - Authentication	3	1	0	4	0%
API - Transaction Processing	2	2	1	5	20%
Cross-Layer - Data Consistency	3	0	0	3	0%
Error Handling (UI + API)	2	1	3	6	50%

RISK ASSESSMENT MATRIX				
Risk Area	Likelihood	Impact	Risk Level	Mitigation
End-to-End Auth Regression	High	Critical	SEVERE	Immediate fix required
UI/API Data Mismatch	Medium	High	HIGH	In progress
Third-Party Integration Failure	Medium	High	HIGH	Under review
Performance Under Load	Low	Medium	MODERATE	Monitored
Security (CORS/Headers)	Low	High	MODERATE	Scheduled audit

Issues & Recommendations

CRITICAL ISSUES LOG

ID	Description	Suite	Severity	Priority	Status
TRG-001	Login authentication timeout under load	UI Automation	High	P1	Open
TRG-002	Auth endpoint token refresh race condition	API Automation	Critical	P1	Open
TRG-003	Dashboard KPI values drift from API summary totals	Cross-Layer	High	P1	Open
TRG-004	Transaction table pagination drops rows on fast scroll	UI Automation	Medium	P2	In Progress
TRG-005	API response schema validation failure on /summary	API Automation	Medium	P2	In Progress
TRG-006	Missing security headers on financial endpoints	API Automation	High	P2	Open
TRG-007	Error handling logic incomplete on empty payloads	Cross-Layer	Critical	P1	Open

RECOMMENDED ACTIONS

#	Recommended Action	Due	Priority
1	Prioritize immediate backend service investigation focusing on the 58 failed API tests to identify common failure patterns	Immediate	P1
2	Conduct detailed analysis of API error responses, timeout patterns, and service availability logs	3 days	P1
3	Review backend service dependencies, database connections, and third-party integration points for Kenya environment	5 days	P2
4	Implement enhanced API monitoring and logging to capture intermittent failures and performance degradation	1 week	P2
5	Execute targeted debugging sessions for high-impact API endpoints affecting revenue calculations and management workflows	1 week	P2
6	Consider temporary rollback or feature flagging of recently deployed backend changes until stability improves	2 weeks	P3

KEY FINDINGS

1	API automation shows critical instability with 72.5% failure rate indicating backend service reliability issues
2	UI layer demonstrates reasonable stability at 82% pass rate suggesting frontend components function correctly when backend services are available
3	Overall system stability at 55% indicates production readiness risks for Revenue Management System Kenya
4	Disproportionate API failures suggest potential issues with service endpoints, data contracts, or environment configuration
5	Gap between UI and API performance indicates backend infrastructure may be root cause of system instability
