RELEASE VERDICT

REQUIRES REMEDIATION

Current: 67% | Target: 90% | Gap: +23%

The Revenue Management System UI automation suite executed 92 tests with 62 passing and 30 failing, achieving a 67% pass rate against the target threshold of 90%. This 23 percentage point gap indicates significant functional issues within the application that require immediate attention. The automated test results reveal that approximately one-third of the system's UI functionality is not performing as expected, suggesting potential defects in the application code, environmental configuration issues, or recent regression introduced in the latest build. The failing tests provide valuable insight into specific areas of the Revenue Management System that need stabilization before the application can be considered release-ready.

RECOMMENDED ACTIONS

#	Recommended Action	Due	Priority
1	Prioritize analysis of the 30 failing tests to identify root causes and defect patterns	Immediate	P1
2	Categorize failures by module to determine which Revenue Management components are most affected	3 days	P1
3	Execute targeted debugging sessions on high-impact failures to expedite fixes	5 days	P2
4	Implement fixes for identified defects and perform regression testing on affected areas	1 week	P2
5	Review recent code changes that may have introduced regressions into previously stable functionality	1 week	P2
6	Consider implementing a phased remediation plan focusing on critical revenue calculation and reporting features first	2 weeks	P3

KEY FINDINGS

1	Current pass rate of 67% falls substantially below the 90% target threshold
2	30 UI test failures indicate multiple functional defects in the Revenue Management System
3	62 passing tests confirm that core functionality remains partially operational
4	The 33% failure rate suggests systemic issues affecting multiple application modules
5	Test execution results provide clear defect patterns for targeted remediation
