RELEASE VERDICT

NEEDS ATTENTION

Current: 86% | Target: 90% | Gap: +4%

The Revenue Management System for Kenya completed automated UI testing with 74 total tests executed, achieving an 86% pass rate with 64 tests passing and 10 failing. While the system demonstrates strong overall functionality, the current pass rate falls 4 percentage points below the 90% target threshold, indicating specific areas within the application require attention to improve stability and reliability. The failed tests represent opportunities to enhance the system's robustness and user experience, particularly focusing on the specific UI components and workflows that did not meet expected behavior during automated validation.

RECOMMENDED ACTIONS

#	Recommended Action	Due	Priority
1	Prioritize investigation of the 10 failing test scenarios to identify root causes in application behavior	Immediate	P1
2	Implement fixes for identified UI defects focusing on highest-impact user workflows first	3 days	P1
3	Conduct targeted manual validation of failing scenarios to gather additional diagnostic information	5 days	P2
4	Review application logs and error messages corresponding to failed test execution timestamps	1 week	P2
5	Schedule focused development effort on UI components showing instability in test results	1 week	P2
6	Plan regression testing cycle after remediation to verify fixes and achieve 90% pass rate target	2 weeks	P3

KEY FINDINGS

1	System achieved 86% pass rate across 74 automated UI tests, approaching but not meeting the 90% target
2	64 tests confirmed successful functionality indicating core revenue management features are operating as expected
3	10 test failures suggest specific UI components or user workflows require stabilization
4	4% gap from target pass rate indicates focused remediation needed on failing scenarios
5	Majority of system functionality validated successfully through automated testing
