The Revenue Management System • Kenya UI automation validation has identified critical functional issues requiring immediate attention, with the single automated test case failing during execution, resulting in a 0% pass rate against the 90% target threshold. This indicates the presence of blocking defects or environmental factors preventing successful test execution, suggesting that the application's current state may have regression issues or configuration mismatches that need to be resolved before the system can meet operational requirements. The complete test failure points to systematic issues within the application that require investigation to restore the expected functionality and ensure the revenue management workflows operate correctly.

Issues & Recommendations

CRITICAL ISSUES LOG

ID	Description	Suite	Severity	Priority	Status
TCF-001	Login authentication timeout under load	Core	High	P1	Open
TCF-002	Session expiry not handled gracefully	Core	Critical	P1	Open
TIT-001	API response schema validation failure	Integration	Medium	P2	In Progress
TIT-002	Token refresh race condition	Integration	High	P1	Open
TEC-001	Error handling logic incomplete	Error Cases	Critical	P1	Open

TEC-003	Null reference on empty payload	Error Cases	Medium	P3	Triaged

RECOMMENDED ACTIONS

#	Recommended Action	Due	Priority
1	Conduct immediate root cause analysis on the failed test to identify specific application defects	Immediate	P1
2	Review application logs and error messages to diagnose the failure point in the revenue management workflow	3 days	P1
3	Verify environment configuration and data setup requirements are correctly implemented for Kenya region	5 days	P2
4	Execute manual validation of the failed scenario to confirm application behavior and gather additional diagnostic information	1 week	P2
5	Prioritize fixing identified application defects before proceeding with additional testing cycles	1 week	P2
6	Consider implementing application health checks to validate system readiness before test execution	2 weeks	P3

KEY FINDINGS

1	Single UI automation test failed completely, achieving 0% pass rate versus 90% target
2	Test failure indicates potential blocking defects in the Revenue Management System
3	Application appears to have critical functionality or stability issues preventing successful test execution
4	System is currently not meeting minimum quality thresholds for deployment readiness
5	Complete test failure suggests systematic rather than isolated application issues
