RELEASE VERDICT

REQUIRES REMEDIATION

Current: 0% | Target: 90% | Gap: **+90%**

The Revenue Management System for Kenya has encountered a critical issue during automated UI validation, with the single test case failing to execute successfully, resulting in a 0% pass rate against the 90% target threshold. This indicates a potential blocking issue within the application's user interface layer that requires immediate investigation to restore system functionality. The failure suggests either a fundamental change in the application's UI components, an environmental configuration issue, or a critical defect in the revenue management workflow that prevents successful test execution. Given that this represents a complete test failure scenario, priority should be given to identifying the root cause within the application to ensure the revenue management capabilities are functioning as expected for Kenya operations.

RECOMMENDED ACTIONS

#	Recommended Action	Due	Priority
1	Investigate application logs to identify the specific UI component or workflow causing the test failure	Immediate	P1
2	Verify the Revenue Management System deployment and configuration settings for Kenya environment	3 days	P1
3	Review recent application changes or deployments that may have affected UI functionality	5 days	P2
4	Conduct manual validation of the failed test scenario to confirm application behavior	1 week	P2
5	Implement application fixes for identified issues and rerun automation to verify resolution	1 week	P2
6	Consider adding application health checks and monitoring to detect similar issues proactively	2 weeks	P3

KEY FINDINGS

1	Complete test failure (0% pass rate) indicates a blocking issue in the Revenue Management System UI
2	Single test case failure suggests a fundamental application issue rather than isolated defects
3	90% target pass rate threshold not met, requiring immediate remediation
4	Kenya revenue management operations may be impacted by the identified UI issue
5	Application stability concerns need to be addressed before expanding test coverage
