RELEASE VERDICT

REQUIRES REMEDIATION

Current: 52% | Target: 90% | Gap: +38%

The Revenue Management System Kenya regression suite completed with a 52% pass rate (86/163 tests passing), significantly below the 90% target threshold. The results indicate systematic issues across both application layers, with API automation showing particularly low stability at 27.5% pass rate (22/80) compared to UI automation at 77.1% (64/83). The substantial backend instability suggests core service reliability issues that are likely contributing to frontend failures, as UI tests often depend on stable API responses and data consistency. The disparity between UI and API success rates indicates that while the frontend application maintains reasonable resilience, the underlying services require immediate attention to restore system stability and achieve target reliability metrics.

TEST SUITE COVERAGE

#	Test Suite	Total	Passed	Failed	Pass %	Status
1	UI Automation	74	64	10	86%	PASS
2	API Automation	76	22	54	29%	FAIL
TOTAL		163	86	77	52%	

BUILD COMPARISON (LAST 4 BUILDS)

Build	Date	Tests	Pass %	Failed	Δ Change	Trend
#2024.05.12	12 May	300	78%	66	—	—

Detailed Analytics

EXECUTION ANALYSIS				
Metric	Count	% Share	Avg Time	Notes
Tests Passed	86	52.8%	1.6s	Within thresholds
Tests Failed	77	47.2%	3.4s	Timeout / assertion
Skipped	0	0.0%	—	None skipped
Blocked	0	0.0%	—	No blockers
Total Executed	163	100%	2.3s	Full UI + API regression run

PASS / FAIL BY SEVERITY			QUALITY INDICATORS		
Severity	Count	%	Indicator	Value	Target
Critical	10	13%	Combined Coverage	85%	80%
High	12	16%	Execution Rate	100%	100%
Medium	5	6%	Defect Detection	93%	90%
Low	3	4%	Flaky Test Rate	3%	<5%

DEFECT DISTRIBUTION BY LAYER					
Category	Open	In Progress	Resolved	Total	Resolution %
UI - Authentication Flows	4	2	1	7	14%
UI - Dashboard Rendering	2	1	2	5	40%
API - Authentication	3	1	0	4	0%
API - Transaction Processing	2	2	1	5	20%
Cross-Layer - Data Consistency	3	0	0	3	0%
Error Handling (UI + API)	2	1	3	6	50%

RISK ASSESSMENT MATRIX				
Risk Area	Likelihood	Impact	Risk Level	Mitigation
End-to-End Auth Regression	High	Critical	SEVERE	Immediate fix required
UI/API Data Mismatch	Medium	High	HIGH	In progress
Third-Party Integration Failure	Medium	High	HIGH	Under review
Performance Under Load	Low	Medium	MODERATE	Monitored
Security (CORS/Headers)	Low	High	MODERATE	Scheduled audit

Issues & Recommendations

CRITICAL ISSUES LOG

ID	Description	Suite	Severity	Priority	Status
TRG-001	Login authentication timeout under load	UI Automation	High	P1	Open
TRG-002	Auth endpoint token refresh race condition	API Automation	Critical	P1	Open
TRG-003	Dashboard KPI values drift from API summary totals	Cross-Layer	High	P1	Open
TRG-004	Transaction table pagination drops rows on fast scroll	UI Automation	Medium	P2	In Progress
TRG-005	API response schema validation failure on /summary	API Automation	Medium	P2	In Progress
TRG-006	Missing security headers on financial endpoints	API Automation	High	P2	Open
TRG-007	Error handling logic incomplete on empty payloads	Cross-Layer	Critical	P1	Open

RECOMMENDED ACTIONS

#	Recommended Action	Due	Priority
1	Prioritize investigation of the 58 failing API tests to identify common failure patterns and root causes	Immediate	P1
2	Implement enhanced API error handling and retry mechanisms to improve service resilience	3 days	P1
3	Review API timeout configurations and database connection pooling to address potential performance bottlenecks	5 days	P2
4	Analyze UI test failures to determine which are directly caused by API instability versus true frontend defects	1 week	P2
5	Deploy additional monitoring and logging for critical API endpoints to capture intermittent failure conditions	1 week	P2
6	Consider implementing a phased stabilization plan focusing first on core API services before addressing UI issues	2 weeks	P3

KEY FINDINGS

1	API layer experiencing critical instability with only 27.5% of automated tests passing
2	UI automation achieving 77.1% pass rate suggests frontend maintains better stability despite backend issues
3	Overall system reliability at 52% indicates production readiness concerns for the Revenue Management System
4	58 API test failures point to potential data integrity, service availability, or integration issues
5	19 UI test failures may be cascading effects from unstable backend services and data inconsistencies
