RELEASE VERDICT

REQUIRES REMEDIATION

Current: 64% | Target: 90% | Gap: +26%

The Revenue Management System for Kenya completed automated UI testing with 91 total tests executed, achieving a 64% pass rate (59 passed, 32 failed) against a target of 90%. The current pass rate indicates significant functional gaps in the application that require immediate attention to ensure system stability and reliability. The 32 failed tests represent critical areas where the application is not performing as expected, suggesting potential issues with UI components, data handling, or integration points that need investigation and resolution before the system can be considered production-ready.

RECOMMENDED ACTIONS

#	Recommended Action	Due	Priority
1	Prioritize analysis of the 32 failed test cases to identify common failure patterns and root causes	Immediate	P1
2	Implement fixes for high-impact UI defects affecting critical revenue management workflows	3 days	P1
3	Conduct focused debugging sessions on components with the highest failure concentration	5 days	P2
4	Establish incremental fix-and-retest cycles to progressively improve the pass rate	1 week	P2
5	Document all identified defects with clear reproduction steps for efficient resolution	1 week	P2
6	Schedule regression testing after each fix deployment to validate improvements and prevent new issues	2 weeks	P3

KEY FINDINGS

1	System achieved 64% pass rate, falling 26 percentage points below the 90% target threshold
2	32 UI test failures indicate multiple functional defects across the application interface
3	59 passing tests confirm core functionality is partially operational
4	The gap between current and target pass rates suggests systemic issues requiring comprehensive remediation
5	Test coverage of 91 scenarios provides substantial insight into application behavior patterns
