RELEASE VERDICT

REQUIRES REMEDIATION

Current: 68% | Target: 90% | Gap: +22%

The Revenue Management System UI automation suite executed 91 tests with 62 passing and 29 failing, achieving a 68% pass rate against the 90% target threshold. The current results indicate that the application exhibits stability issues in approximately one-third of the tested scenarios, suggesting that certain UI components or workflows within the Revenue Management System require immediate attention to improve reliability. The gap between current performance and the target pass rate represents a significant opportunity to enhance system stability through focused remediation efforts on the failing test scenarios.

RECOMMENDED ACTIONS

#	Recommended Action	Due	Priority
1	Analyze the 29 failing tests to identify common failure patterns and affected UI components	Immediate	P1
2	Prioritize fixes for high-impact failures that affect critical revenue management workflows	3 days	P1
3	Implement targeted bug fixes for the most frequently failing UI elements or transactions	5 days	P2
4	Establish a defect triage session to categorize failures by severity and business impact	1 week	P2
5	Deploy incremental fixes and rerun automation suite to track improvement toward 90% target	1 week	P2
6	Consider implementing additional error handling and recovery mechanisms in unstable UI areas	2 weeks	P3

KEY FINDINGS

1	System achieved 68% pass rate with 29 out of 91 tests failing, indicating substantial UI instability
2	22 percentage point gap exists between current performance and the 90% target threshold
3	62 tests passing demonstrates that core functionality remains operational in majority of scenarios
4	The 32% failure rate suggests systemic issues in specific application modules or user workflows
5	Current test results provide clear visibility into areas requiring immediate stabilization
