RELEASE VERDICT

REQUIRES REMEDIATION

Current: 48% | Target: 90% | Gap: +42%

The Revenue Management System Kenya regression suite completed with 163 total tests achieving a 48% pass rate (79 passed, 84 failed), significantly below the 90% target threshold. The test results reveal systemic issues across both UI and API layers, with API automation showing particularly low stability at 27.5% pass rate (22/80) compared to UI automation at 68.7% (57/83). The correlation between backend instability and frontend failures suggests that many UI test failures may be symptomatic of underlying API defects rather than isolated frontend issues. The substantial gap between current performance and target metrics indicates the application requires immediate technical intervention to address core functionality and integration points between system layers.

TEST SUITE COVERAGE

#	Test Suite	Total	Passed	Failed	Pass %	Status
1	UI Automation	75	57	18	76%	WARN
2	API Automation	76	22	54	29%	FAIL
TOTAL		163	79	84	48%	

BUILD COMPARISON (LAST 4 BUILDS)

Build	Date	Tests	Pass %	Failed	Δ Change	Trend

Detailed Analytics

EXECUTION ANALYSIS				
Metric	Count	% Share	Avg Time	Notes
Tests Passed	79	48.5%	1.6s	Within thresholds
Tests Failed	84	51.5%	3.4s	Timeout / assertion
Skipped	0	0.0%	—	None skipped
Blocked	0	0.0%	—	No blockers
Total Executed	163	100%	2.3s	Full UI + API regression run

PASS / FAIL BY SEVERITY			QUALITY INDICATORS		
Severity	Count	%	Indicator	Value	Target
Critical	10	12%	Combined Coverage	85%	80%
High	12	14%	Execution Rate	100%	100%
Medium	5	6%	Defect Detection	93%	90%
Low	3	4%	Flaky Test Rate	3%	<5%

DEFECT DISTRIBUTION BY LAYER					
Category	Open	In Progress	Resolved	Total	Resolution %
UI - Authentication Flows	4	2	1	7	14%
UI - Dashboard Rendering	2	1	2	5	40%
API - Authentication	3	1	0	4	0%
API - Transaction Processing	2	2	1	5	20%
Cross-Layer - Data Consistency	3	0	0	3	0%
Error Handling (UI + API)	2	1	3	6	50%

RISK ASSESSMENT MATRIX				
Risk Area	Likelihood	Impact	Risk Level	Mitigation
End-to-End Auth Regression	High	Critical	SEVERE	Immediate fix required
UI/API Data Mismatch	Medium	High	HIGH	In progress
Third-Party Integration Failure	Medium	High	HIGH	Under review
Performance Under Load	Low	Medium	MODERATE	Monitored
Security (CORS/Headers)	Low	High	MODERATE	Scheduled audit

Issues & Recommendations

CRITICAL ISSUES LOG

ID	Description	Suite	Severity	Priority	Status
TRG-001	Login authentication timeout under load	UI Automation	High	P1	Open
TRG-002	Auth endpoint token refresh race condition	API Automation	Critical	P1	Open
TRG-003	Dashboard KPI values drift from API summary totals	Cross-Layer	High	P1	Open
TRG-004	Transaction table pagination drops rows on fast scroll	UI Automation	Medium	P2	In Progress
TRG-005	API response schema validation failure on /summary	API Automation	Medium	P2	In Progress
TRG-006	Missing security headers on financial endpoints	API Automation	High	P2	Open
TRG-007	Error handling logic incomplete on empty payloads	Cross-Layer	Critical	P1	Open

RECOMMENDED ACTIONS

#	Recommended Action	Due	Priority
1	Prioritize API defect triage by categorizing the 58 failed API tests by endpoint and error type for targeted fixes	Immediate	P1
2	Implement API response monitoring and logging enhancements to capture detailed failure patterns and root causes	3 days	P1
3	Establish temporary UI test retry mechanisms with extended timeouts to differentiate true UI defects from API-related failures	5 days	P2
4	Deploy backend service health checks and circuit breakers to improve system stability during test execution	1 week	P2
5	Create API-UI dependency mapping to identify which frontend failures are directly caused by backend issues	1 week	P2
6	Schedule focused debugging sessions with development team to address top 10 most frequently failing API endpoints first	2 weeks	P3

KEY FINDINGS

1	API layer showing critical instability with only 27.5% tests passing, indicating fundamental backend service issues
2	UI automation achieving 68.7% pass rate suggests frontend functionality partially operational but impacted by backend dependencies
3	Overall system integration showing significant degradation with 42% gap from target pass rate
4	Cross-layer failures pattern indicates cascading effects from API instabilities affecting UI test execution
5	Revenue Management System core functionalities appear compromised requiring systematic troubleshooting
