RELEASE VERDICT

REQUIRES REMEDIATION

Current: 64% | Target: 90% | Gap: +26%

The Revenue Management System Kenya UI automation suite executed 91 tests with 59 passing and 32 failing, achieving a 64% pass rate against the 90% target. This significant gap of 26 percentage points indicates that the application currently exhibits multiple functional issues that prevent successful completion of automated user workflows. The 32 failed tests represent critical areas where the application behavior deviates from expected functionality, suggesting systemic issues within the revenue management workflows that require immediate attention. The test results provide valuable insight into specific application modules and features that need stabilization before the system can meet production readiness criteria.

RECOMMENDED ACTIONS

#	Recommended Action	Due	Priority
1	Prioritize investigation of the 32 failed test scenarios to identify root causes in application code	Immediate	P1
2	Group failures by functional module to determine if specific revenue components are disproportionately affected	3 days	P1
3	Implement fixes for high-impact failures that block critical revenue management workflows	5 days	P2
4	Establish daily regression monitoring to track application stability improvements	1 week	P2
5	Create defect tickets for each unique failure pattern to ensure systematic resolution	1 week	P2
6	Schedule focused debugging sessions between development and test environments to reproduce and resolve failing scenarios	2 weeks	P3

KEY FINDINGS

1	Application stability at 64% pass rate falls significantly below the 90% target threshold
2	32 test failures indicate multiple functional defects across the revenue management workflows
3	59 passing tests confirm core functionality remains operational in certain system areas
4	26 percentage point gap suggests widespread application issues requiring comprehensive remediation
5	Current application state presents risk to production deployment and end-user experience
