RELEASE VERDICT

REQUIRES REMEDIATION

Current: 0% | Target: 90% | Gap: **+90%**

The Revenue Management System UI automation execution completed with a 0% pass rate, falling significantly below the 90% target threshold. The single automated test case failed during execution, indicating a critical issue preventing successful validation of the system's user interface functionality. This complete test failure suggests either a fundamental blocking issue in the application's UI layer, environmental configuration challenges, or a breaking change in the system that requires immediate investigation. The Revenue Management System requires focused troubleshooting to identify and resolve the root cause preventing successful test execution, followed by re-validation to ensure the system meets quality standards before progression.

RECOMMENDED ACTIONS

#	Recommended Action	Due	Priority
1	Investigate failed test logs to identify specific error conditions and failure points in the Revenue Management System	Immediate	P1
2	Verify application deployment status and confirm all required services are operational	3 days	P1
3	Check for recent code changes or deployments that may have impacted UI functionality	5 days	P2
4	Validate test environment configuration including database connectivity and API endpoints	1 week	P2
5	Execute manual smoke test of critical UI workflow to isolate automation versus application issues	1 week	P2
6	Schedule focused debugging session with development team to resolve blocking issue before re-execution	2 weeks	P3

KEY FINDINGS

1	Revenue Management System achieved 0% pass rate versus 90% target requirement
2	Single UI automation test case failed completely during execution
3	System behavior prevented successful completion of automated validation
4	Critical blocker exists preventing UI functionality verification
5	Application readiness for release cannot be confirmed based on current results
